Organic Fostering: "No Capes Required"

30-second AI video (photoreal, not animation) · 9:16 vertical · Instagram Reels, TikTok and Facebook

CONCEPT

The idea

Foster carers are everyday heroes, but their superpowers look completely ordinary. This video films those ordinary moments like a superhero film: slow motion, dramatic wind, a golden shimmer, and a bold "superpower" label on each one.

The twist is that none of the powers are special. Patience, remembering the little things, turning up in the rain. Ordinary people already have them, and Organic Fostering gives them the training.

Line: Real superpowers. Fully trained.

Reference

Pinterest blocks automated browsing, so I couldn't open individual pins. The idea draws on the "everyday hero" and "not all heroes wear capes" theme that runs through foster-carer quotes and graphics on Pinterest, brought to life with cinematic slow-motion AI video.

Why it's eye-catching

- An apron flying like a cape in the first second is funny and unexpected, so people stop scrolling.
- Epic film style on everyday moments makes people smile, and they share it with carers they know.
- It answers the biggest doubt people have, "I'm not special enough to foster", without saying it out loud.

Why it's new

Earlier AI videos showed a child's belongings ("Unpacked") and a child growing up ("The Doorframe"). This is the first one about the foster carers themselves and the qualities they need. It shows single and couple carers, men and women.

SCRIPT

HOOK · 0–3 s

Visual: A kitchen in warm light. A woman ties an apron round her neck and it flutters behind her like a cape in heroic slow motion as steam swirls past. A deep cinematic "boom".

On-screen text: Foster carers don't wear capes…

Voiceover: "Foster carers don't wear capes…"

THE SUPERPOWERS · 3–21 s

Visual: A fast, cinematic montage of about 3 seconds per shot. Each shot is in slow motion with a soft golden shimmer, and a bold label slams in on the beat.

1. **SUPER-PATIENCE:** a man sits on the landing outside a closed bedroom door with two mugs of hot chocolate. He waits calmly, and the door opens a crack.
2. **SUPER-MEMORY:** close-up of a carer cutting the crusts off toast, just how she likes it.
3. **SUPER-HEARING:** in the car, a carer glances at the mirror, sees a quiet teenager and gently turns the music down.
4. **SUPER-STRENGTH:** a carer carries a sleeping child from the car to the front door at night (child's face hidden against the shoulder).
5. **SUPER-VOLUME:** a couple cheer wildly on a muddy football touchline in the pouring rain.
6. **SUPER-CALM:** 2am, one kitchen light on, a carer and a child share a glass of milk at the table.

Voiceover: "...they just have very particular skills."

PAYOFF · 21–26 s

Visual: Back to the kitchen. The apron "cape" drops to normal and the woman laughs. Quick cuts to a training session and a friendly social worker at a kitchen table.

On-screen text: Real superpowers. Fully trained.

Voiceover: "You don't need experience. Just time, a spare room, and the heart for it. We'll give you full training and ongoing support."

CTA · 26–30 s

Visual: End card on the magenta-to-orange gradient with the OF logo. A small cape shape sweeps across and turns into the underline under the headline.

On-screen text: Could you make room? · Start the conversation · 0161 241 1332 · organicfostering.co.uk · Rated Good by Ofsted

Voiceover: "Could you make room? Start the conversation with Organic Fostering."

AI PRODUCTION

Style line: add to every prompt

Photorealistic, vertical 9:16, cinematic superhero-film look, dramatic slow motion, warm golden rim light, shallow depth of field, cosy UK home, natural skin texture, no text, no logos.

Example prompts

- **Hook:** a woman in her 40s ties a floral apron round her neck in a warm UK kitchen; the apron billows behind her like a superhero cape in slow motion; steam swirls; low heroic camera angle.
- **Super-patience:** a man in his 50s sits calmly on a carpeted landing beside a closed bedroom door, holding two mugs of hot chocolate; soft evening light; the door slowly opens a crack.
- **Super-volume:** a couple in raincoats cheer wildly on a muddy grassroots football touchline in heavy rain; slow motion; raindrops lit by floodlights.

Tips

- Generate 5-second clips and use the best 3 seconds of each.
- Add the labels, golden shimmer and text in the edit, not in the AI generation.
- Keep children's faces hidden or out of focus.

Sound

- An epic, tongue-in-cheek orchestral build with a heavy "boom" on each label slam, then it drops to soft, warm piano at the payoff.
- Warm, slightly playful Northern English voiceover.

CAPTION

Not all heroes wear capes. Some just cut the crusts off. 🦸🧡

The skills foster carers need are often the everyday ones you already have. No previous experience needed; we give you full training and ongoing support.

SAFEGUARDING AND COPY CHECK

- Turn on Instagram's "AI info" label and add the on-screen note "AI-generated imagery".
- Never use likenesses of real children in care; keep children's faces hidden or out of focus.
- No previous experience needed, time and flexibility, a spare bedroom, full training, ongoing support, "Could you make room?" and "Rated Good by Ofsted" all come from Organic Fostering's own website and materials.
