MARGIN TRADING/FUTURE TRADING IN PMEX.

Margin trading—also known as buying on margin—allows you to use leverage to boost your purchasing power and make larger investments than you could with your own resources.

In our local language, buying/selling done on token money (Bojana) is called Margin Trading.

Futures contracts, or simply "futures," are traded on futures exchanges. PMEX is a Futures Exchange regulated by Securities & Exchange Commission of Pakistan.

Short-selling of commodities can also be done in PMEX.
