# Client videos: Seedance 2.5 prompts

**Google Ranker Pro / Hulk Marketing · 9 client videos for 6 websites · 11 prompts, each 30 seconds or less**

Every prompt is written to look like real footage from a phone or a small documentary camera: real light, rain, weight and skin texture, no studio gloss. Each prompt carries the client's own lines (spoken on camera, or as voiceover in their voice). You generate the raw clips with no text in them; we add the website visuals, before and after, real Search Console and Business Profile numbers, reviews, captions, labels and music in the edit.

| # | Your format | Client · website | Final video | Prompts | Attach |
|---|---|---|---|---|---|
| 1 | Testimonial, 60-90 s | Golden Line Taxis · goldenlinetaxiswarwick.co.uk | about 90 s · 16:9 | 3 (30 + 30 + 17 s) | Golden Line owner's sheet |

| 9 | Reaction clip, 15 s | Leam Taxis · leamingtonspa-taxis.co.uk | 15 s · 9:16 | 1 (15 s) | Leam owner's sheet |

## How to generate

1. **Make six character sheets, one per client person**, from their own photos with their permission (these videos say they are that client). Plain everyday clothes with no logos, in the outfit the prompts expect:
   - Golden Line Taxis owner: a dark quilted jacket over a plain grey fleece
   - Coventry Airport Taxis 247 owner: a plain navy jumper with the sleeves pushed up
   - Leam Taxis owner: a dark fleece zipped to the chin
   - York Cars manager: a dark work jacket over a plain sweatshirt, a radio earpiece, a lanyard with the card turned round
   - Organic Fostering director: a soft grey knit cardigan over a plain top, a lanyard with the card turned round
   - Zentro owner: a plain navy or charcoal work top
2. **Higgsfield settings for every prompt:** Seedance 2.5 · Reference mode · the ratio and seconds shown above the prompt · **1080p (set it; it can default lower)** · Audio on. If you use the selectors: Era 2020s, Physics realistic, Genre documentary or unset, Lens 24 mm for videos 3, 4, 5, 7, 8 and 9; leave Lens unset for videos 1, 2 and 6, whose shots mix fields of view.
3. **Attach the character sheet so it is @Image 1**, paste the prompt exactly as written, and generate. Video 4 needs no attachment. Before generating, scroll to the end of the prompt box and check the last line (it starts "Filmed ...") is still there; if it is cut off, stop and tell us.
4. **Voice:** the client's lines are inside each prompt, with the second each one starts. Seedance makes the voice. To keep one voice per client across prompts (video 1's three parts; Coventry in videos 2, 4 and 8; Leam in videos 3 and 9): once you have a take you like, cut 5-10 seconds of its audio, attach it as @Audio 1 in that client's next prompt, and add this line at the end of the ASSET MAP: `@Audio 1: voice reference for the owner's voice only; ignore its background sound.` If the client sends a voice memo of their own voice, use that as @Audio 1 instead. In video 4, replace the line `No references attached.` with that @Audio 1 line and use Reference mode, not text to video.
5. **The lines are draft wording.** Send each client their lines first. If they change a line, change it in the prompt (same start second, similar length) and in the script table.

6. **If a clip looks AI, plastic or like a game render,** change one thing at a time: remake the character sheet from daylight phone photos (a glossy sheet gives a glossy video); regenerate; if one shot inside a prompt keeps failing, ask us for a split version of that prompt (removing a shot means renumbering every later second in TIMELINE, FORMAT MODE and AUDIO) and generate the failing shot on its own.

---

## Send back with the clips

- York Cars' written OK to show a re-created yard and dispatch office, and whether their dispatchers use handheld radios and the manager wears an earpiece and lanyard (if not, we change the props).
- Each client's real car colour and body shape: change "plain dark saloon" (video 1), "plain dark grey saloon" (video 3) and "plain black people carrier" (video 5) to match before generating (plates and livery stay hidden).
- File names: the prompt name plus the take, for example `c01_P1_16x9_t1.mp4`. Send the takes you like and the near misses, and note the settings you used.
- Each client's written OK for their lines and likeness.
- Confirmation that the 114-calls Business Profile is Leam Taxis' and the 79-interactions profile is Coventry Airport Taxis 247's.
- A dated screenshot of each client's own Google reviews, if you want review cards in the edit (we blur names and quote word for word).
- Old-website captures from the Wayback Machine in your own browser, for the website before and after: Golden Line (before October 2023), Coventry (before October 2024), York Cars (snapshot from September 2025).
- What Hulk did for York Cars (footer credits Xoom Media), Coventry (footer credits SMEK), Leam Taxis (no credit on the site), Organic Fostering and Zentro, so the end cards say the right thing.

# 01 · Testimonial · Golden Line Taxis (goldenlinetaxiswarwick.co.uk)

| | |
|---|---|
| **Your format** | Client video 1: Testimonial, 60 to 90 sec |
| **Website** | goldenlinetaxiswarwick.co.uk |
| **Final length · ratio** | about 90 s · 16:9 (homepage and case study) |
| **Attach** | @Image 1 = the Golden Line Taxis owner's character sheet (all three prompts) |
| **Prompts** | 3 (30 s + 30 s + 17 s) |

**What the finished video shows:** a Warwick taxi owner, parked up before sunrise, says in his own words where his work used to come from, what changed when the new website went live, and what he would tell another taxi firm. The edit then shows the proof: today's goldenlinetaxiswarwick.co.uk on his laptop, the footer credit "Made with ❤ by Hulk Marketing Ltd", and his real Search Console numbers for 19 Jul–18 Oct 2026 (312 clicks, 18.2K times shown, 744 different searches, his brand name at position 1.8 on average, "warwick airport taxi" at 6.1). Hook: a phone lighting up on a dark dashboard while he speaks.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-1 s | edit: black | - | One wiper thunk. AI label from 1 s to the end, small, lower left: `AI re-creation, made with [Name]'s permission. His approved words, AI voice. Real data.` |
| 1-5 s | Prompt 1, 1-5 s: his phone lights up face-up on the dark dashboard; his hand lifts it | Voiceover: "Phone on the dash, waiting for the next job." | No title. The buzz carries the hook |
| 5-20 s | Prompt 1, 5-20 s: in the driver's seat, filmed from the passenger seat | "Most of our work was regulars. Word of mouth, people who knew us." · "Someone new searching online wouldn't really find us." | Name and role at 6 s, as he approves them (or `Owner, Golden Line Taxis`), never "Ali" on its own. Word-timed captions, white Inter, two lines at most |
| 20-30 s | Prompt 1, 20-30 s: head and shoulders, then a tired half-laugh | "What was missing was a proper website. Somewhere people could actually book." | Captions |
| 30-44 s | Prompt 2, 0-14 s: his back office at dusk, laptop open with a green screen | "When the new website went live, people started finding us on Google." · "They can see what we do and book online." | Corner-pinned on his green laptop: first the old site for 3 s, only if you send a Wayback capture (source line `goldenlinetaxiswarwick.co.uk · Wayback Machine capture · [date]`); then today's site, `assets/sites/goldenlinetaxiswarwick/now_desktop.pn` crop `200, 226, 470, 382` ("Book Warwick Taxis Online" and the quote-and-book form, with the site's "No.1" tagline and review badge kept out of frame); then the footer, `now_desktop_full.png` crop `0, 6544, 1440, 810` |
| 44-47 s | edit: the footer at full frame | - | Orange underline under "Hulk Marketing Ltd" (crop `1070, 7306, 225, 46`) with a soft tick. Source line `goldenlinetaxiswarwick.co.uk · site footer · captured [publish date]` |

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 47-52 s | Prompt 2, 14-19 s: his hand scrolls on the trackpad, green screen | Voiceover: "And now I can actually see what people search to find us." | His real Search Console totals, `assets/gsc/goldenlinetaxiswarwick_gsc_3m.png` crop `24, 201, 720, 110`, keyed into the screen, then pushed to full frame: `312 clicks from Google · 18.2K times shown`, underline under 312. Source line `Google Search Console · goldenlinetaxiswarwick.co.uk · 19 Jul–18 Oct 2026`. Navy `#0B1628` card, orange `#F7931E` underline, slow push-in, no count-ups or arrows |
| 52-60 s | edit: receipt cards | - | `744 different searches` (crop `930, 2135, 410, 40`); `brand searches: top two on average (1.8)` (row 1, crop `24, 904, 1318, 49`); `airport taxi warwick · avg 5.3` (row 20, crop `24, 1837, 1318, 49`); `warwick airport taxi · avg 6.1 · 13% click-through` (row 6, crop `24, 1150, 1318, 49`). Context strip: `Average position over 3 months. Positions 1–10 are page one.` |
| 60-71 s | Prompt 2, 19-30 s: close, a half-smile, a sip of tea | "Day to day, bookings come through the site while I'm out driving." | Captions |
| 71-81 s | Prompt 3, 0-10 s: back in the car at first light, engine running | "Get a website that's easy to find and easy to book." | Captions. The phone in the vent mount lights at about 79 s |
| 81-87 s | Prompt 3, 10-16 s: his car pulls away from the kerb | - | **Review card, only if you send a dated screenshot of Golden Line's own Google reviews:** one or two real reviews, word for word, names and photos blurred, source line `Google review · Golden Line Taxis Business Profile · screenshot dated [date]` |
| 87-90 s | edit: end card over the empty street | - | `Website by Hulk Marketing Ltd` and the Google Ranker Pro lockup |

No music under his words; a sparse licensed bed may come in at 81 s. Never on screen: "No.1", "#1", "first", growth words, percentages of increase, count-ups, Google's logo or colours on our graphics.

- **Testimonial:** before the new website most of his work was regulars and word of mouth; since it went live, new customers find him on Google and book online; his advice to another firm is to get a site that's easy to find and book. He says no numbers; every number is ours, on screen, with its source.
- **Before and after:** the "before" is told in his words. For a real website before and after, open `web.archive.org/web/*/goldenlinetaxiswarwick.co.uk/*` in your own browser and capture the last version before the current site (around October 2023), if one exists; we never mock up an old site. Check one thing with him first: Hulk Marketing Ltd was incorporated in September 2024, after that October 2023 build, so confirm which launch he means by "the new website". The data has no "before" either: Search Console shows one 3-month period, so no growth claims.
- **Positive reviews:** send a dated screenshot of Golden Line's own Google Business Profile reviews and we add one or two, word for word, names blurred. Never use the website's review quotes (the same texts appear under different names, including the two "Ali" reviews), the "100+ reviews" badge, the "4.6" counter or "15,000+ happy customers". Never generate or voice a review; his own testimonial is the review of the agency.

## Prompts

| # | Prompt | What | Seconds | Ratio | Attach |
|---|---|---|---|---|---|
| 1 | c01_P1_16×9 | Before sunrise in his car: phone on the dash, then his answer about the old days | 30 | 16:9 | Owner's character sheet |

ASSET MAP
@Image 1: identity of the owner of a small Warwick taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
Before sunrise on a wet late-October morning, the owner of a small Warwick taxi firm sits in his own parked car on a terraced street, engine off, and tells an interviewer in the passenger seat how his work used to come in. It opens on his phone lighting up on the dark dashboard, turns on his answer, and ends with a tired half-laugh.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots inside the same parked car, with HARD CUTS at second 5 and second 20. Real-time motion. No fades, no dissolves, no transition effects. The car, his clothes, the light direction and the rain stay the same across every cut.

LOCATION MAP
Inside his own parked car, a right-hand-drive saloon, on a red-brick terraced street in Warwick before sunrise, engine off. He sits in the driver's seat on the right; the interviewer and the camera are in the front passenger seat on the left. The windscreen is beaded with rain, the wiper parked halfway up the glass. Through the driver's window behind him: wet terraced house fronts and one street lamp, soft. On the dashboard: a phone in a plain dark case, a parking ticket lying face-down, a charging cable looping down to the console. A plain paper coffee cup with no print in the door pocket.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-5s): the first frame already shows the dark dashboard from low across it, the phone lying face-up with its screen edge-on to the lens and unlit, the rainy windscreen and the parked wiper above. Nobody in frame yet.
Shot 2 (5-20s): the first frame of the shot already contains the owner in the driver's seat, filling the right half of the frame, his left hand resting on top of the wheel, the phone now face-down in the tray in front of the gear lever, the vent mount empty. His torso is angled towards the passenger seat; his eyes are just past camera-left on the interviewer; lips closed.
Shot 3 (20-30s): the same axis, tighter: his head and shoulders, the rainy driver's window soft behind him.

OPTICS
Shot 1: 47° diagonal field of view, camera 40 centimetres from the phone, low across the dashboard; the phone sharp, the windscreen softly out of focus.
Shot 2: about 60° diagonal field of view, camera 70 to 90 centimetres from his face, natural perspective, the cabin readable around him, the street beyond the glass soft.
Shot 3: 47° diagonal field of view, standard normal lens character, camera about 90 centimetres from his face, natural face proportions, the window behind him softly out of focus.

CAMERA
Shot 1: resting on the dashboard edge; static except for faint micro-movement.
Shots 2 and 3: handheld by the interviewer sitting in the passenger seat: subtle breathing rhythm, small weight shifts, gentle human reframes when he leans; never gimbal-smooth, never shaky. Focus stays on his eyes.

TIMELINE
0-1s (Shot 1): Ambience only, rain on the roof. End state: the phone dark.
1-4s: At second 1 the phone lights up face-up and buzzes against the plastic, its glow spreading across the roof lining; his voiceover starts. End state: the phone lit, buzzing.
4-5s: His left hand comes in from the right edge and lifts the phone off the dashboard. End state: hand and phone leaving frame.
5-6s (Shot 2): HARD CUT at second 5. He settles in the seat and takes a breath. End state: lips parted, about to speak.
6-11s: At second 6 @Image 1 the owner says, in natural British English, "Most of our work was regulars. Word of mouth, people who knew us.", unhurried, glancing down at the wheel once mid-line. End state: eyes back on the interviewer.
11-13s: A pause; his thumb rubs the top of the wheel; one slow breath. End state: lips parted again.
13-17s: At second 13 he says, "Someone new searching online wouldn't really find us.", with a small shrug. End state: line finished, lips closed.
17-20s: He looks out through the windscreen at the wet street; ambience only. End state: eyes on the street.
20-21s (Shot 3): HARD CUT at second 20 to his head and shoulders. He turns back to the interviewer. End state: eyes on the interviewer.
21-26s: At second 21 he says, "What was missing was a proper website. Somewhere people could actually book.", plainly, with one small nod at the end. End state: lips closed.
26-29s: He rubs the back of his neck with his left hand, gives a short half-laugh through his nose and settles back against the headrest. End state: settled, the half-smile fading.
29-30s: He holds, breathing; ambience only.
```

```
PHYSICS
The phone buzzes and creeps a millimetre across the plastic; the seat and his jacket compress as he shifts; the wheel takes the weight of his forearm; rain beads on the glass gather and run down in short jerks; his breath shows faintly in the cold cabin; the car rocks very slightly when he settles back against the seat.

LIGHTING
Blue-grey early daylight through the car windows mixed with the warm amber of street lamps outside; the dashboard stays dark; the face is lit softly from the side window and falls off into shadow on the far cheek; rain beads on the glass catch small points of light. In shot 1 the phone's glow lights the roof lining and his fingers for a moment as he lifts it. In shots 2 and 3 the soft key on his face is the window light through the passenger-side window behind the camera; the street lamp beyond the driver's window gives only a faint rim.
Natural skin from the reference, visible pores and fine texture, unretouched; a little stubble shadow along the jaw.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: steady rain on the roof, water running in the gutter outside, a distant car hissing past on a wet road.
Foley: the phone buzzing against the dashboard from 1 to 4 seconds; a jacket rustle as he lifts it at 4 seconds; his thumb rubbing the wheel at 11 seconds; the seat creaking as he settles back at 28 seconds.
Voiceover, shot 1 only: his voice, off screen and not lip-synced to anyone in frame, close and quiet, in natural British English. At second 1: "Phone on the dash, waiting for the next job."
Dialogue: only the quoted lines, spoken by the owner at seconds 6, 13 and 21, in natural British English; lips still when not speaking; no other voices.
Clean close dialogue as if from a clip-on microphone, the small cabin sound underneath, no echo.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
His head and shoulders settled against the headrest, the half-smile fading, rain running down the window behind him.

POSITIVE CONSTRAINTS
Muted colour inside a parked car as it really looks: a charcoal dashboard and grey seat fabric, rain beads on the glass, the world outside soft and grey; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
The phone screen is never readable: it is edge-on, face-down or turned away from the camera.
Only his hand in shot 1; exactly one person visible in shots 2 and 3. No extra people.
Filmed on a handheld documentary video camera in available light: natural colour with a restrained grade, fine even digital grain, soft highlight roll-off on bright windows, real depth of field with a gently soft background.
```

ASSET MAP
@Image 1: identity of the owner of a small Warwick taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
At dusk in late October, the owner of a small Warwick taxi firm sits at the table in his own small back office, a laptop open beside him, and tells an interviewer what changed when his new website went live and what his days are like now. It starts settled, turns on his hand on the laptop, and ends with a sip of tea.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots in the same room, with HARD CUTS at second 14 and second 19. Real-time motion. No fades, no dissolves, no transition effects. The room, his clothes, the laptop, the mug and the light direction stay the same across every cut.

LOCATION MAP
A small back office in a terraced house: a plain wooden table, a radiator with chipped paint under a window on camera-right showing blue-grey dusk, a coat on a hook, a wall calendar turned face to the wall, a phone charger cable trailing off the table edge to a socket on the floor. He sits at the table facing the camera. An open laptop stands at the left edge of the frame, which is on his right-hand side, its screen turned partly towards the camera. A plain mug with a tea ring sits by his right hand, a thin thread of steam rising from it; his phone lies face-down beside it; his car keys on their fob lie on the table. A small lamp with a plain fabric shade stands just out of frame on the left, switched on.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-14s): the first frame already contains the owner seated centre-right, forearms on the table edge, torso angled slightly towards camera-left, eyes just past camera-left on the interviewer; his right hand loose beside the mug, his left hand flat on the table.
Shot 2 (14-19s): a close shot of his right hand resting on the laptop's trackpad, the green screen filling about two
```

thirds of the frame with all four corners visible, the mug's steam soft in the foreground. No face.
Shot 3 (19-30s): a close-up of his face from the same side of the room as shot 1, eyes just past camera-left, the dusk window soft behind his left shoulder.

OPTICS
Shot 1: 47° diagonal field of view, standard normal lens character, camera on a tripod 2.5 metres away across the room at seated eye height, natural proportions, the room behind softly out of focus.
Shot 2: 47° diagonal field of view, camera 60 centimetres from the trackpad, the screen and the hand sharp, the mug soft in front.
Shot 3: 29° diagonal field of view, short telephoto portrait lens character, camera 3 to 4 metres away, close framing through lens reach, the background compressed and softly blurred, his face sharp.

CAMERA
Shot 1: locked off on a tripod with the faint micro-movement of a real head; one small natural focus correction when he sits back.
Shot 2: static on the tripod, lowered and moved closer to the table.
Shot 3: locked off on the tripod; focus on his eyes.

TIMELINE
0-1s (Shot 1): Ambience only. He takes a small breath in. End state: lips parted.
1-6s: At second 1 @Image 1 the owner says, in natural British English, "When the new website went live, people started finding us on Google.", unhurried, glancing once at the laptop mid-sentence and back. End state: eyes back on the interviewer.
6-8s: A short pause; he swallows and gives one small nod. End state: lips parted again.
8-11s: At second 8 he says, "They can see what we do and book online.", and taps the table twice with two fingers on the last word. End state: line finished.
11-14s: He sits back in the chair, breathing, a half-smile. End state: leaning back.
14-15s (Shot 2): HARD CUT at second 14 to his right hand on the trackpad; still; his voiceover starts. End state: fingers resting.
15-18s: His index and middle fingers slide slowly up the trackpad in one unhurried scroll and stop; his voiceover plays. End state: fingers resting near the top of the trackpad.
18-19s: The hand stays still; steam drifts up from the mug. End state: still.
19-20s (Shot 3): HARD CUT at second 19 to his face, close. End state: eyes on the interviewer, lips parted.
20-24s: At second 20 he says, "Day to day, bookings come through the site while I'm out driving.", plainly, his eyes dropping to the laptop off frame once and coming back. End state: lips closed.
24-28s: A half-smile and one small nod; he reaches for the mug and drinks. End state: the mug lowered to the table.
28-30s: He holds; ambience only.

PHYSICS
The chair takes his weight and creaks as he sits back; his sleeve drags slightly on the table; the tea in the mug shivers when he taps the table; his fingertips flatten slightly on the trackpad and the skin creases at the knuckles; the mug has weight in his hand and the tea tips as he lifts it; steam rises, breaks up and drifts away from the screen.

LIGHTING
A warm tungsten ceiling bulb or lamp camera-left is the key; cool blue-grey dusk from a window camera-right; the two colour temperatures meet on the face; corners of the room fall into soft shadow. The laptop screen gives off almost no light.
Natural skin from the reference, visible pores and fine texture, unretouched; a slightly creased collar.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: a small back-office room tone, a radiator ticking, light rain on the window, a distant car on a wet road.
Foley: a two-finger tap on the table at 10 seconds; a chair creak at 11 seconds; the soft whisper of fingertips on the trackpad from 15 to 18 seconds; the mug lifted and set down from 25 to 27 seconds.
Voiceover, shot 2 only: his voice, off screen and not lip-synced to anyone in frame, close and calm, in natural British English. At second 14: "And now I can actually see what people search to find us."
Dialogue: only the quoted lines, spoken by the owner at seconds 1, 8 and 20, in natural British English; lips still when not speaking; no other voices.
Clean close dialogue as if from a clip-on microphone, natural room tone underneath, no echo.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
His face in close-up after the sip, a half-smile, eyes on the interviewer, the dusk window soft behind him.

POSITIVE CONSTRAINTS
Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
In shots 1 and 2, the laptop screen shows a flat, uniform, matte chroma-green fill from edge to edge, evenly lit, with no interface, no text, no reflections and no glare; all four corners and the bezel stay visible, with one small dark dot in each corner of the green. The screen gives off almost no light.

```
Exactly one person visible. No extra people.
Filmed on a handheld documentary video camera in available light: natural colour with a restrained grade, fine even digital grain, soft highlight roll-off on bright windows, real depth of field with a gently soft background.
```

```
ASSET MAP
@Image 1: identity of the owner of a small Warwick taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
At first light on a wet late-October morning, the owner of a small Warwick taxi firm sits in his parked car with the engine running and gives one line of advice to other taxi firms; then, seen from across the road, his car pulls away from the kerb and drives off along the grey street.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: two shots, with one HARD CUT at second 10 from inside the car to the opposite pavement. Real-time motion. No fades, no dissolves, no transition effects.

LOCATION MAP
Shot 1: inside his parked right-hand-drive saloon on a red-brick terraced street, engine running, first grey light; he sits in the driver's seat on the right, the interviewer and camera in the front passenger seat. His phone sits upright in the vent mount to his left, turned towards him, so from the passenger seat its screen is seen edge-on. Rain on the windscreen, the wiper parked halfway up the glass.
Shot 2: the same terraced street from the opposite pavement. The camera stands on a small tripod at waist height on the opposite pavement, looking straight across the road; his plain dark saloon is parked side-on at the far kerb about 8 metres away, its nose pointing to frame right, so neither number plate faces the lens; the soft rear corner of a parked hatchback fills the lower-left foreground, out of focus. Wet tarmac, flattened brown leaves in the gutter, red-brick house fronts beyond.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-10s): the first frame already contains the owner in the driver's seat, filling the right half of the frame, both hands resting low on the wheel, eyes just past camera-left on the interviewer, lips closed.
Shot 2 (10-17s): the first frame of the shot already shows his car at the far kerb, engine running, exhaust vapour curling from the back, a soft shape of him at the wheel through the wet side glass, not readable as a face.

OPTICS
Shot 1: about 60° diagonal field of view, camera 70 to 90 centimetres from his face, natural perspective, the cabin readable, the street beyond the glass soft.
Shot 2: 47° diagonal field of view, standard normal lens character, camera about 8 metres from the car across the road, the street readable but not exaggerated.

CAMERA
Shot 1: handheld by the interviewer in the passenger seat: subtle breathing rhythm, small weight shifts, never gimbal-smooth, never shaky; focus on his eyes.
Shot 2: static on a small tripod at waist height on the opposite pavement; the camera does not follow the car.

TIMELINE
0-1s (Shot 1): Ambience; the engine idles. End state: lips parted, about to speak.
1-5s: At second 1 @Image 1 the owner says, in natural British English, "Get a website that's easy to find and easy to book.", plainly, as if to another driver. End state: lips closed.
5-8s: He gives one small nod, looks ahead through the windscreen and moves both hands to the top of the wheel. End state: hands on the wheel, eyes ahead.
8-10s: At second 8 the phone in the vent mount lights up, its screen edge-on and unreadable, its cool glow falling on his fingers; the car does not move. End state: the phone lit, his eyes flicking to it.
10-11s (Shot 2): HARD CUT at second 10 to the pavement. The car idles at the kerb. End state: unchanged.
11-13s: The amber side indicator facing the camera blinks; the car pulls out from the kerb, its nose angling into the road towards frame right, the body rising slightly on its suspension. End state: the car in the road, moving right, side-on to the camera.
13-15s: It gathers speed along the street and leaves the right edge of frame at second 15, side-on the whole way, its exhaust vapour hanging in the air behind it. End state: the street empty.
15-17s: The empty wet street; drizzle; ambience only.

PHYSICS
In shot 1 the idling engine sends a faint vibration through the wheel and the phone mount; his hands settle on the wheel with real weight. In shot 2 the car has real weight: suspension settles after it stops, tyres flex on the kerb, road grime along the sills, rain beads on the bonnet, reflections of the grey sky distort across the panels. The tyres hiss through a puddle as it pulls away and the water ripples after it.
```

LIGHTING
Shot 1: Blue-grey early daylight through the car windows mixed with the warm amber of street lamps outside; the dashboard stays dark; the face is lit softly from the side window and falls off into shadow on the far cheek; rain beads on the glass catch small points of light. The soft key on his face is the window light through the passenger-side window behind the camera; the street lamp beyond the driver's window gives only a faint rim.
Shot 2: Flat overcast sky as a huge soft source from above; wet tarmac reflects the grey sky; no direct sun.
Natural skin from the reference, visible pores and fine texture, unretouched.

AUDIO
Ambience: shot 1, the idling engine and rain on the roof; shot 2, the street in light drizzle, a gutter dripping, a distant road.
Foley: the phone's short buzz at 8 seconds; the indicator ticking from 11 seconds; tyres hissing through wet tarmac from 12 seconds; the engine note fading along the street from 15 seconds.
Dialogue: only the quoted line, spoken by the owner at second 1, in natural British English; lips still when not speaking; no other voices.
Clean close dialogue as if from a clip-on microphone in shot 1.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
The empty wet terraced street, the exhaust vapour thinning, the camera holding.

POSITIVE CONSTRAINTS
Shot 1: Muted colour inside a parked car as it really looks: a charcoal dashboard and grey seat fabric, rain beads on the glass, the world outside soft and grey; people in navy, grey and mid-blue everyday clothes; nothing saturated.
Shot 2: Muted autumn colour as it really looks: wet slate greys, an overcast white sky, wet black tarmac, red-brick terraces and cream stucco, cold white LED and older amber street light; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
A plain dark saloon with no livery, no door lettering, no roof sign text, no decals. The front and rear number plates are angled away from the camera, out of focus, or hidden behind a foreground object. It waits at a kerb, a driveway or a drop-off zone, never on a rank.
Exactly one person: the owner, seen clearly in shot 1 and only as a soft shape through the glass in shot 2. No extra people.
Filmed on a handheld documentary video camera in available light: natural colour with a restrained grade, fine even digital grain, soft highlight roll-off on bright windows, real depth of field with a gently soft background.

# 02 · Results walkthrough · Coventry Airport Taxis 247 (coventryairporttaxis247.co.uk)

| | |

| **Your format** | Client video 2: Results walkthrough, 30 to 45 sec |
| **Website** | coventryairporttaxis247.co.uk |
| **Final length · ratio** | about 45 s · 16:9 (homepage and case study) |
| **Attach** | @Image 1 = the Coventry Airport Taxis 247 owner's character sheet |
| **Prompts** | 1 (30 s) |

**What the finished video shows:** after his last airport run, the owner sits at his kitchen table, opens his laptop and sees his three months of Google numbers for the first time. We key his real Search Console screenshots into the green laptop screen and cut his reactions to the exact moments: 224 clicks, 15.9K times shown, 508 different searches, "coventry airport taxi" on page one on average (7.0). He names the job he wants most. It is a "first look", never growth (there is only one 3-month period).

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-9 s | Prompt, 0-9 s: from behind his shoulder he sits down, drops his keys and pulls the laptop in; green screen | Voiceover: "Three months of Google, all in one place." · "Good to see it all laid out." | Chip, top left: `Coventry Airport Taxis 247 · three months on Google`. | 33-37 s | edit: receipt card | - | Row 2, crop `24, 953, 1318, 49`, underline under `22.0`: `airport transfers coventry · 607 times shown · avg 22.0 · the next one` |

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 37-41 s | edit: before and after (only if you confirm the profile is his) | - | `assets/gsc/coventry_gbp_interactions_may-oct2026.png`, headline and chart crop `40, 175, 890, 310`, underline the printed `79`: `79 Business Profile interactions, May to October · almost none in May, about 32 in August`. Source line `Google Business Profile · May–Oct 2026 · October is a part month` |
| 41-45 s | edit: closing card | - | Totals crop `0, 121, 718, 110` over the pagination crop, chip `First look at three months`; then `assets/sites/coventryairporttaxis247/now_desktop.p` headline crop about `740, 180, 540, 280` in a plain browser frame; end-card lockup. No "website by" line (the site footer credits SMEK) |

No music under his line. Never on screen: "No.1", "#1", "just hit", growth words, up-arrows, Google's logo or colours on our graphics.

- **Testimonial:** he says it's good to see three months of Google laid out in one place, and that the airport runs are the jobs he wants: when someone types "coventry airport taxi", he wants it to be his firm. No numbers in his mouth; they are ours, on screen.
- **Before and after:** Search Console has only one 3-month period, so this is a first look, never growth (send a Search Console Compare export for a growth version later). The honest before and after for this website is the Business Profile chart: almost no interactions in May against about 32 in August 2026. Confirm it is Coventry Airport Taxis 247's profile first (the name is not visible in the screenshot). A website design before and after needs Wayback captures from your own browser (the last capture before Oct 2024, and one from about May 2026).
- **Positive reviews:** none usable yet. Send a dated screenshot of Coventry Airport Taxis 247's own Google Business Profile reviews with the profile name visible; we quote them word for word, names and photos blurred. Never use the site's "4.9 / 202" widget (it is the Slough Global Cars 247 feed), the "4.6 / 100+ reviews" block or its carousel (including the duplicated "Ali" reviews), and never generate a review.

ASSET MAP
@Image 1: identity of the owner of a small Coventry airport-taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
On a wet late-October evening, after his last airport run, the owner of a small Coventry airport-taxi firm sits down at his kitchen table, pulls his laptop closer and reads his last three months of Google numbers for the first time, with an interviewer sitting across the table. It starts with him sitting down, turns on his quiet reactions, and ends with one line about the job he wants most.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: four shots at the same kitchen table, with HARD CUTS at second 9, second 16 and second 21. Real-time motion. No fades, no dissolves, no transition effects. The kitchen, his clothes, the laptop, the mug and the light direction stay the same across every cut.

LOCATION MAP
A small kitchen in the evening: a wooden table, the doorway to the hall opposite him behind the laptop, a kettle and a toaster on the worktop behind him, a pendant bulb over the end of the table on his right, a window behind him to his left with blue-grey dusk outside and rain on the glass, a phone charger cable across the table, a plain mug of tea, a pen. His car keys on a plain fob in his hand at the start. The laptop sits square in front of him on the table. The interviewer is never in frame: behind the camera in shot 1, across the table just camera-left of the lens in shots 2 to 4.
```

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-9s): the camera is about 1 metre behind him and slightly to his right, at shoulder height, looking over his right shoulder. In the first frame he is already pulling the chair out with his left hand, keys in his right hand. Once seated he fills the left third of the frame: the back of his head, his right shoulder and the edge of his right ear; the laptop stands square in front of him in the centre-right of the frame, its green screen fully visible with all four corners.
Shot 2 (9-16s): a close-up of his face from across the table, with the interviewer sitting just camera-left of the lens; the laptop screen faces away from the camera; his eyes are down on the screen.
Shot 3 (16-21s): a medium close-up from the same side, his hands and the pen in frame at the bottom edge.
Shot 4 (21-30s): a close-up from the same side as shot 2; he lifts his eyes to the interviewer just past camera-left.

OPTICS
Shot 1: 47° diagonal field of view, standard normal lens character, camera about 1 metre behind his shoulder, the green screen sharp, the kitchen behind it readable.
Shots 2 and 4: 29° diagonal field of view, short telephoto portrait lens character, camera 3 metres away, his face sharp, the kitchen compressed and softly blurred behind him.
Shot 3: 47° diagonal field of view, camera 2 metres away, natural proportions.

CAMERA
Shot 1: handheld behind his shoulder with subtle breathing rhythm and small weight shifts, then settling still once he is seated and the screen is in place; never gimbal-smooth.
Shots 2 to 4: locked off on a tripod with faint micro-movement; focus on his eyes.

TIMELINE
0-1s (Shot 1): He pulls the chair out with his left hand. End state: the chair out, keys in his right hand.
1-4s: He sits; at second 2 he drops the keys on the table beside the laptop with a clatter and pulls the laptop a few centimetres closer with both hands. End state: seated, hands on the laptop's sides, the screen square in front of him.
4-9s: He sits still, reading, his head tilting slightly forward; the camera settles still; his voiceover plays. End state: still, reading.
9-10s (Shot 2): HARD CUT at second 9 to his face, close. He reads, eyes moving along a line. End state: reading.
10-13s: He leans in a few centimetres and his eyebrows lift. End state: leaning in, eyebrows raised.
13-16s: He breathes out through his nose and gives one small slow nod; lips closed. End state: settled, still reading.
16-17s (Shot 3): HARD CUT at second 16 to the medium close-up. End state: his hands on the table, the pen beside the mug.
17-21s: A short laugh through his nose; he rubs his jaw with his left hand, picks up the pen with his right and points it towards the screen out of frame, then sets it down. End state: the pen down, both hands on the table.
21-22s (Shot 4): HARD CUT at second 21 to the close-up. He lifts his eyes from the screen to the interviewer. End state: eyes on the interviewer, lips parted.
22-27s: At second 22 @Image 1 the owner says, in natural British English, "The airport runs. Someone types in Coventry airport taxi, I want that to be us.", calm and certain, glancing back at the screen once and up again. End state: lips closed.
27-29s: He half-closes the laptop lid with one hand and picks up his tea. End state: the mug in his hand at chest height.
29-30s: He holds; ambience only.

PHYSICS
The chair legs scrape on the floor; the keys land with weight and slide a few centimetres; the laptop moves with a little friction on the wood; his weight settles into the chair; the pen taps lightly as it is set down; the laptop lid has a real hinge and stops where his hand leaves it; the tea tips as he lifts the mug.

LIGHTING
Shot 1, filmed from behind him: A warm tungsten ceiling bulb or lamp camera-right is the key; cool blue-grey dusk from a window camera-left; the two colour temperatures meet across the back of his neck and shoulders; corners of the room fall into soft shadow. Shots 2 to 4: A warm tungsten ceiling bulb or lamp camera-left is the key; cool blue-grey dusk from a window camera-right; the two colour temperatures meet on the face; corners of the room fall into soft shadow.
In shots 2 to 4 the screen's glow is faint: the laptop screen faces away from the camera; its cool white glow lights the face from below, brighter on the chin and under the nose. The laptop screen in shot 1 gives off almost no light.
Natural skin from the reference, visible pores and fine texture, unretouched; tired eyes after a long shift.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: a quiet kitchen in the evening, a fridge humming, rain on the window, the kettle ticking as it cools.
Foley: the chair scraping at 0 seconds; the keys clattering on the table at 2 seconds; the laptop sliding at 3 seconds; a short breath out at 14 seconds; a laugh through the nose at 17 seconds; the pen set down at 20 seconds; the laptop lid at 27 seconds.
Voiceover, shot 1 only: his voice, off screen and not lip-synced to anyone in frame, close and quiet, in natural British English. At second 3: "Three months of Google, all in one place." At second 6: "Good to see it all laid out."
Dialogue: only the quoted line, spoken by the owner at second 22, in natural British English; lips still and closed in shots 2 and 3 and whenever he is not speaking; no other voices.
Clean close dialogue as if from a clip-on microphone, natural room tone underneath, no echo.
No background music. No subtitles. At least 1 second of ambience-only after the last word.

FINAL FRAME

```
His face in close-up, mug of tea at chest height, the laptop half-closed below frame, eyes on the interviewer.

POSITIVE CONSTRAINTS
Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
In shot 1, the laptop screen shows a flat, uniform, matte chroma-green fill from edge to edge, evenly lit, with no interface, no text, no reflections and no glare; all four corners and the bezel stay visible, with one small dark dot in each corner of the green. The screen gives off almost no light. In shots 2 to 4 the laptop screen is angled away from the camera; only the back of the lid is visible.
Exactly one person visible. No extra people.
Filmed on a handheld documentary video camera in available light: natural colour with a restrained grade, fine even digital grain, soft highlight roll-off on bright windows, real depth of field with a gently soft background.
```

# 03 · Milestone · Leam Taxis (leamingtonspa-taxis.co.uk)

| | |
|---|---|
| **Your format** | Client video 3: Milestone clip, 15 to 20 sec |
| **Website** | leamingtonspa-taxis.co.uk |
| **Final length · ratio** | about 19 s · 9:16 (Reels, TikTok, Shorts) |
| **Attach** | @Image 1 = the Leam Taxis owner's character sheet |
| **Prompts** | 1 (18 s) |

**What the finished video shows:** at the end of a night shift the Leam Taxis owner films himself on his phone, walking from his car to his front door, and says the number in his own words: a hundred and fourteen calls from his Google listing, May to October 2026, with September the best of those six months at twenty-five. The real Business Profile chart is on screen from the first second. A running total is the one milestone this data proves, so there is no growth claim.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-2 s | Prompt, 0-2 s: selfie by his car, two buzzes in his pocket, he bumps the car door shut | - | By 0.5 s, in the top band: crop `20, 165, 240, 80` of `assets/gsc/leamingtonspa_gbp_calls_may-oct2026.png` ("114 · Calls made from your Business Profile"), exact pixels on our navy card. Source line: `Calls made from your Business Profile · May–Oct 2026 · October part month`. Strip: `Leam Taxis' Business Profile, confirmed by the owner` with his name and date. AI label, lower left, throughout: `AI re-creation, made with [Name]'s permission. His approved words, AI voice. Real data.` |
| 2-10 s | Prompt, 2-10 s: he walks along the wet terraced street at night, talking to his phone | "A hundred and fourteen calls off our Google listing, May to October." | Orange underline under "114" with a soft tick. From 4 s the real chart wipes on under it, left to right (crop `15, 265, 910, 210`, real pixels, never redrawn; October stays as captured and is never called a drop). Name caption: his name and `Owner, Leam Taxis, Leamington Spa`. Word-timed captions ("114") |
| 10-16.5 s | Prompt, 10-16.5 s: at his front door under the porch light; he says the second line, laughs, turns the key | "September was the best of those six months. Twenty-five." | On "Twenty-five": the September tooltip crop `735, 278, 100, 55` ("25 · September 2026") punches in with an underline and a tick. Caption: `September: 25 calls, the best of the six months shown.` |
| 16.5-19 s | edit: end card over his last frame, darkened | - | Headline and chart crop `15, 165, 910, 310` with its source line and `114 calls May–Oct 2026 (October part month).` Website: `assets/sites/leamingtonspa-taxis/now_mobile.png` crop about `0, 140, 780, 800` in a plain phone frame labelled `leamingtonspa-taxis.co.uk`. End-card lockup. No "website by" line |

No music under his lines; the street, rain, footsteps, keys and lock carry it. Never on screen: "No.1", "#1", "first", "since May", "more", "up", growth words, percentages, up-arrows, count-ups.

- **Testimonial:** in two short lines he says his Google listing brought a hundred and fourteen calls from May to October and that September was the best of those months with twenty-five. He may reword them, but the numbers stay exactly "a hundred and fourteen" and "twenty-five", and he says "calls", not "customers" or "bookings". Confirm first that the 114-calls profile is Leam Taxis' (the screenshot shows no business name).
- **Before and after:** none in this video, honestly. The website design has not changed since about 2019, so a website before and after would show the same site, and the calls chart is one six-month running total. For a real before and after later, send a Business Profile Calls screenshot for Nov 2025–Apr 2026 with the profile name visible. We never mock up an old site.

- **Positive reviews:** none usable yet. Send a dated screenshot of Leam Taxis' own Google Business Profile reviews; we quote them word for word, names and photos blurred. Never use the six website testimonials (undated, not linked to any review platform). Never generate or voice a review.

ASSET MAP
@Image 1: identity of the owner of a small Leamington taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
Late on a wet October night, at the end of his shift, the owner of a small Leamington taxi firm films himself on his phone's front camera as he shuts his car door, walks along his terraced street and stops at his own front door, saying two short lines about his calls. It starts with a buzz in his pocket and the car door, turns on his first line as he walks, and ends with the key turning in his door.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: two shots, both filmed by him on his own phone's front camera, with one HARD CUT at second 10 from the street to his front door. Real-time motion. No fades, no dissolves, no transition effects. His clothes, the night, the rain and the phone camera look stay the same across the cut.

LOCATION MAP
Shot 1: the pavement of a terraced street in Leamington at night: cream stucco and red-brick house fronts on the right side of the frame, doors and windows dark, house numbers soft or out of frame; a line of parked cars along the kerb on the left side of the frame, among them his own plain dark grey saloon, side-on, its front passenger door, on the pavement side, open at the start; a cold white LED street lamp on the kerb a few metres behind him, one older amber lamp far down the street; flattened brown leaves in the gutter; a plain dark wheelie bin at the kerb half cut off at the left edge.
Shot 2: his own front door: a plain painted door with a frosted glass panel, a small step, a warm porch light in a plain wall lantern above the door; the dark street behind him.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-10s): the first frame already contains him at arm's length on his front camera, standing beside his car on the pavement: his head and shoulders in the lower-middle of the vertical frame, a little right of centre, the top of his head at about 40 percent of the frame height, the street filling the upper part behind him; his right upper arm runs out of the lower-left edge towards the phone; the open car door stands just behind his right hip at the left edge of the frame; his left hand hangs at his side below frame, holding his keys. His eyes are on the screen just below the lens; lips closed; a breath of vapour in front of his mouth.
Shot 2 (10-18s): the first frame of the shot already contains him at his front door, framed the same way on the front camera, his body turned three-quarters towards his front door, which fills the right edge of the frame about 40 centimetres from him; his head turned back to the phone; his left hand at chest height at the right edge of the frame holding a key already pushed into the lock; the porch lantern above the door just out of frame at the top-right.

OPTICS
About 80° diagonal field of view, phone front-camera perspective, lens 40 to 55 centimetres from the face at arm's length, slightly above eye level. The face sits close and slightly enlarged at the centre, the background visible to the frame edges and mostly in focus, straight lines stay straight, no portrait bokeh.

CAMERA
The phone is held in his own outstretched right hand; the frame moves with his arm and his stride: a gentle bob with each footfall, slight handheld micro-shake, small drifts, a natural re-grip once at second 9.
His eyes flick between the lens and the screen image of himself, as people do on a front camera.
Auto exposure breathes slightly as he passes the street lamp, and again when the porch light fills the frame in shot 2, then settles.

TIMELINE
0-1s (Shot 1): At second 0 a phone in his fleece pocket gives two short message buzzes; his eyes drop towards the pocket for a moment and come back to the screen. End state: the car door still open behind his right hip.
1-2s: He bumps the car door shut with his right hip without looking; it lands with a heavy thunk at second 1 and the car rocks once on its suspension; he turns and starts to walk. End state: walking towards camera, the car falling
```

behind.
2-7s: At second 2 @Image 1 the owner says, in natural British English, "A hundred and fourteen calls off our Google listing, May to October.", at an easy walking pace and a conversational volume, eyes flicking between the lens and the screen, one small nod near the end. End state: line finished, a half-smile.
7-10s: He breathes out; a cloud of breath vapour drifts past his cheek; at second 9 he re-grips the phone and the frame jolts slightly and settles; the wheelie bin falls away behind him. End state: still walking, eyes on the screen.
10-11s (Shot 2): HARD CUT at second 10 to his front door. He stands still, a small breath. End state: lips parted, key in the lock.
11-15s: At second 11 he says, "September was the best of those six months. Twenty-five.", quietly, with a small pause before the last word. End state: lips closed, a half-smile starting.
15-17s: A small laugh through his nose; at second 16 his left hand turns the key; the lock clunks; the door stays shut. End state: the key turned, his hand still on it.
17-18s: He holds, looking at the screen; ambience only.

PHYSICS
Each heel strikes the wet pavement and his weight rolls forward; his shoulders rise and fall with the stride; the fleece creases at the shoulder of the raised arm; the keys in his left hand chink with each step; his breath leaves his mouth as vapour and drifts back over his shoulder; drizzle beads gather on the fleece shoulders and darken the fabric. The car has real weight: suspension settles after it stops, tyres flex on the kerb, road grime along the sills, rain beads on the bonnet, reflections of the grey sky distort across the panels. The key meets resistance in the lock before it turns.

LIGHTING
Shot 1: Cold white LED street lamps mixed with one older amber lamp further down the street are the only light; wet pavement reflects both; the face is lit from one side by the nearest lamp and falls into shadow on the other; a faint rim of lamp light separates the head and shoulders from the dark street.
Shot 2: the warm bulb in the wall lantern above his front door, camera-right, is the key; it lights the top of his head and the side of his face nearest the door and falls off into soft shadow on the far cheek; the street behind stays dark except one cold street lamp far away.
Natural skin from the reference, visible pores and fine texture, unretouched.

AUDIO
Ambience: a quiet terraced street at night in drizzle: rain pattering on parked cars, a gutter dripping, a car hissing past on a wet road one street away; in shot 2 the same street, quieter, rain dripping from the porch.
Foley: two short phone buzzes muffled by the fleece pocket at second 0; the car door's heavy thunk at second 1; his footsteps on wet paving from 2 to 10 seconds; keys chinking with each step; a fleece rustle and a small handling knock at the re-grip at 9 seconds; the lock clunking at 16 seconds.
Dialogue: only the quoted lines, spoken by the owner at seconds 2 and 11, in natural British English; lips still when not speaking; no other voices.
Sound recorded by the phone's built-in microphone at arm's length: close voice with a little reflection off the house fronts, faint handling noise when the grip shifts.
No background music. No subtitles. At least 1 second of ambience-only after the last word.

FINAL FRAME
His face on the front camera at his front door, the key turned, a half-smile, the porch light warm above.

POSITIVE CONSTRAINTS
Muted autumn colour as it really looks: wet slate greys, an overcast white sky, wet black tarmac, red-brick terraces and cream stucco, cold white LED and older amber street light; people in navy, grey and mid-blue everyday clothes; nothing saturated. Tonight the low cloud is dark, faintly lit by the town.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
A plain dark grey saloon with no livery, no door lettering, no roof sign text, no decals. The front and rear number plates are angled away from the camera, out of focus, or hidden behind a foreground object. It waits at a kerb, a driveway or a drop-off zone, never on a rank. Every car stays parked and empty.
His door shows no house number; it is out of frame or hidden.
Exactly one person visible. No extra people.
Filmed handheld on a smartphone front camera at arm's length: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.

# 04 · Before and after · Coventry Airport Taxis 247 (coventryairporttaxis247.co.uk)

| | |
|---|---|
| **Your format** | Client video 4: Before and after, 20 to 30 sec |
| **Website** | coventryairporttaxis247.co.uk |
| **Final length · ratio** | 25 s · 16:9 (case study) |
| **Attach** | Nothing (the driver is seen only from the chest down; the owner is heard, not seen) |
| **Prompts** | 1 (22 s) |

**What the finished video shows:** the same parked taxi, the same framing, twice. "May": the phone in the mount stays dark. "August": it lights up twice and the driver lifts it out. Over it the owner says the before and after in his own words, and the edit lands the real Google Business Profile chart: 79 interactions May to October 2026, almost none in May against about 32 in August. It is a dramatised reconstruction of real data, labelled as such.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-2 s | edit: split screen, left the "May" plate (prompt 1-3 s), right the "August" plate (prompt 9-11 s) | - | Hook card on the seam: `May: almost nothing. August: about 32 interactions.` Chips `May 2026` / `Aug 2026`. Label, lower left, throughout: `Dramatised reconstruction. His approved words, AI voice. Real data.` |
| 2-8 s | prompt 1-7 s: "May", the phone stays dark, fingers drum, one wiper sweep | Voiceover: "Back in May, the phone hardly went." | Chip `May 2026` |
| 8-16 s | prompt 8-16 s: "August", the identical frame, the phone lights twice, the driver lifts it out | Voiceover: "By August, it kept going." | Chip `Aug 2026` |
| 16-22 s | edit: the real chart between the frozen plates | - | `assets/gsc/coventry_gbp_interactions_may-oct2026.png`, headline and chart crop `40, 175, 890, 310`, revealed left to right (real pixels, never redrawn); a ring on the May point and the August point. Card: `79 Business Profile interactions, May to October · almost none in May, about 32 in August`. Source line: `Google Business Profile · May–Oct 2026 · October is a part month`. Context: `Interactions: calls, chat clicks, bookings and website clicks.` |
| 22-25 s | prompt 17-20 s: a hand turns a face-down phone face-up, its glow on the fingers | - | The `79` crop `40, 175, 210, 80` with an underline; website capture `assets/sites/coventryairporttaxis247/now_desktop.p` headline crop about `740, 180, 540, 280` in a plain browser frame showing `coventryairporttaxis247.co.uk`. Lockup from 23 s. No "website by" line |

No music under the voice; drizzle, the wiper and the buzzes carry it. Never on screen: "No.1", "#1", percentages of increase, up-arrows, count-ups, Google's logo or colours on our graphics.

- **Testimonial:** in two short lines the owner says the phone hardly went in May and kept going by August. He may reword them (no numbers, no "doubled" or "tripled").
- **Before and after:** the honest before and after for this website is the Business Profile chart: almost no interactions in May against about 32 in August 2026, inside one dated screenshot. Confirm in writing that this is Coventry Airport Taxis

247's profile first (the business name is not visible in the screenshot); the Calls tab for the same dates helps. A website design before and after needs Wayback captures from your own browser (the last capture before Oct 2024).

- **Positive reviews:** none needed in this cut. For Coventry's other videos send a dated screenshot of the business's own Google Business Profile reviews; never use the site's Slough "4.9 / 202" widget, the "4.6 / 100+ reviews" block or the duplicated "Ali" reviews.

ASSET MAP
No references attached.

SCENE CONTEXT
On an overcast, drizzly afternoon a private-hire driver sits in a parked car on a wet Coventry kerb, engine off,
waiting for work, seen only from the chest down. In the first shot his phone stays dark; after a hard cut to exactly
the same frame it lights up twice and he lifts it out; a last close shot shows a phone on the dashboard being turned
face-up. The owner of the firm talks over it, off screen.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots, with HARD CUTS at second 8 and second 16. Shots 1 and 2 are the same
locked-off frame from the same camera position, the same light and the same car: only the phone and the hands change.
Real-time motion. No fades, no dissolves, no transition effects.

LOCATION MAP
Inside a parked right-hand-drive family saloon on a wet Coventry kerb by a slip road, engine off. Shots 1 and 2: the
camera is a phone lying on its side, propped against a rolled-up jacket on the passenger seat, lens at the driver's
chest height, 1 metre from the steering wheel, angled diagonally forward and across the cabin towards the driver's
side. Foreground: the soft edge of the grey passenger seat cushion in the bottom-left corner. Left third: a plain
black spring-grip mount clipped to the centre air vent holding a phone in a plain dark case, turned towards the
driver's door so only its side edge and the dark back of the case face the lens; below it the gear lever with a white
charging cable looped over it, and a half-empty plain water bottle in the cup holder. Centre: the lower half of the
steering wheel, its centre plain with no badge. Dashboard: charcoal plastic with a film of dust, the instrument
cluster and screen dark, a parking ticket face-down and a little crooked by the windscreen. Beyond the windscreen:
drizzle, a wet kerb, the grey slip road. Shot 3: the camera is held by someone in the passenger seat, lens level with
the top of the dashboard, 40 centimetres from a phone lying face-down on the dashboard just left of the steering
wheel, close under the windscreen.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-8s): the first frame already contains the driver's hands on the wheel and the dark phone in its mount. The
driver is seen only from the chest down: a plain dark everyday jacket with the cuffs pushed back a little, both bare
hands on the lower half of the wheel, the left hand at eight o'clock within 30 centimetres of the phone, the right
hand at four o'clock. The top edge of the frame runs across his chest; his face never enters the frame. The seatbelt
is off and hangs slack.
Shot 2 (8-16s): the first frame of the shot is identical to the first frame of shot 1: the same hands in the same
places, the same dark phone, the same dashboard and the same drizzle.
Shot 3 (16-22s): the first frame of the shot already contains the phone lying face-down on the dashboard, seen almost
edge-on, and the driver's left hand resting on the top of the wheel rim at the right of the frame.

OPTICS
Shots 1 and 2: about 80° diagonal field of view, phone main-camera perspective, propped at chest height 1 metre from
the wheel; deep edge-to-edge focus from the gear lever to the slip road; no telephoto compression, no creamy bokeh.
Shot 3: about 80° diagonal field of view, 40 centimetres from the phone; the phone sharp, the windscreen and street
beyond soft but readable.

CAMERA
Shots 1 and 2: the filming phone is propped on the seat and never touched; the frame stays completely still apart from
a faint tremor when the driver's weight shifts. The windscreen stays slightly overexposed.
Shot 3: handheld by the passenger, nearly still: faint micro-shake, one small correction at second 19, no gimbal
smoothness.

TIMELINE
```

0-1s (Shot 1): Ambience only. Both hands rest on the wheel; the phone is dark. End state: still.
1-4s: The fingers of the left hand drum slowly on the rim, stop for a beat, then drum again; the phone stays dark; the voiceover plays. End state: the left fingers resting on the rim.
4-6s: At second 4 the left hand flicks the wiper stalk down once; the wiper makes one sweep, drags the drizzle into a smeared arc and drops back to rest; the hand returns to the rim. End state: the glass cleared, both hands on the wheel.
6-8s: Hands still; the phone stays dark; fresh drizzle beads gather on the glass. End state: unchanged.
8-9s (Shot 2): HARD CUT at second 8 to exactly the same frame. Both hands rest on the wheel; the phone is dark. End state: still.
9-10s: At second 9 the phone lights up and buzzes, rattling against the grips of the mount; a faint cool glow falls on the left fingers. End state: the phone lit.
10-11s: The screen goes dark; the left hand settles. End state: phone dark.
11-12s: At second 11 the phone lights up and buzzes again. End state: the phone lit.
12-15s: The left hand leaves the wheel, grips the sides of the case, pulls the phone out of the spring grips, which snap back, and lifts it up out of the top of the frame, the screen kept turned towards the driver. End state: the empty mount, the right hand alone on the wheel.
15-16s: Hold on the empty mount; the driver does not speak. End state: unchanged.
16-17s (Shot 3): HARD CUT at second 16 to the dashboard. The phone lies face-down and dark. End state: still.
17-18s: At second 17 the phone buzzes against the hard dashboard and creeps a few millimetres; a thin line of cool light leaks out round the edges of the case. End state: light at the edges.
18-20s: The left hand leaves the wheel and rolls the phone over onto its back, the screen swinging towards the right of the frame and never towards the lens; it lands face-up with a soft knock, its screen edge-on, its glow lighting the fingertips from below. End state: the phone face-up and lit, the fingers resting beside it.
20-22s: Hold; drizzle on the windscreen; ambience only.

PHYSICS
The fingertips press slightly into the rim and lift off with a small delay; the jacket sleeve shifts on the forearm; the wiper rubber drags water in a smeared arc and judders once at the top of its sweep; the phone rattles in the grips when it buzzes and the grips snap back when it is pulled out; the phone on the dashboard creeps on the dust and lands with weight; drizzle beads gather and run in short trickles; the car does not move.

LIGHTING
Flat overcast daylight through the windscreen is the only key, soft and slightly cool; the side window camera-right adds a brighter edge; the cabin roof and footwell fall into soft shadow; the windscreen itself is slightly overexposed. The phone's glow is faint against the daylight.
Real skin texture with visible pores and fine hairs on the backs of the hands; a plaster on one knuckle.
Plain dark everyday clothes; no logos, no printed text. The driver is only partly in frame, from the chest down, and his face is never seen.
Hands relaxed with natural knuckle creases and veins; five fingers each.

AUDIO
Ambience: drizzle ticking on the roof and windscreen, tyres hissing past on the wet slip road nearby.
Foley: fingertip taps on the wheel from 1 to 4 seconds; the wiper stalk click at 4 seconds and the wiper's whirr, squeak and soft thunk from 4 to 6 seconds; the phone buzzing and rattling in the mount at 9 and 11 seconds; the grips snapping back at 13 seconds; the phone buzzing on the hard dashboard at 17 seconds and landing with a soft knock at 19 seconds.
Voiceover: the voice of the owner of a small Coventry airport-taxi firm, off screen and not lip-synced to anyone in frame, close and plain, in natural British English. At second 1: "Back in May, the phone hardly went." At second 12: "By August, it kept going." Only these words; the driver in frame never speaks; no other voices. The ambience ducks a little under the voice.
Sound from the phone's microphone: close cabin sound, faint road noise outside.
No background music. No subtitles. At least 1 second of ambience-only at the head and the tail.

FINAL FRAME
The phone face-up on the dusty dashboard, its glow on the driver's fingertips, drizzle on the windscreen beyond.

POSITIVE CONSTRAINTS
Muted colour inside a parked car as it really looks: a charcoal dashboard and grey seat fabric, rain beads on the glass, the world outside soft and grey; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
The phone screens never face the lens; they are seen only as a glow or edge-on. The car has no badge, livery or lettering.
Exactly one person, seen only from the chest down or as one hand. No face. No extra people.
Filmed handheld on a smartphone main camera: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.

# 05 · Premises or team tour · York Cars (yorkcars.co.uk)

| | |
|---|---|
| **Your format** | Client video 5: Premises or team tour, 30 sec |
| **Website** | yorkcars.co.uk |
| **Final length · ratio** | 30 s · 16:9 (Local SEO service page) |
| **Attach** | @Image 1 = the York Cars manager's character sheet |
| **Prompts** | 1 (30 s) |

**What the finished video shows:** on a wet Saturday night the York Cars manager walks us from the yard into the dispatch office and says, in their own words, what a Saturday night is like and what customers ask for most. The edit then adds the real yorkcars.co.uk site, the "Based on 2,695 reviews" count its review widget shows, and its pages for 15 suburbs and villages and 13 airports. Hook: frame 1 is the car door landing shut in the yard. The yard and office are generated and generic (no livery, no signs), not York Cars' own, and the on-screen label says so. York Cars must agree to this in writing first; if they can film the real walk from the yard to the dispatch desk on a phone, send it and we cut that instead.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-12 s | Prompt, 0-12 s: the car door lands shut; the manager crosses the wet yard, talking back over their shoulder, and pulls the office door open | "Saturday nights don't stop. Town, the station, the villages, then straight back into town." | AI label, small, lower left, throughout: `AI re-creation, made with [Name]'s permission. Their approved words, AI voice. Yard and office re-created, not filmed at York Cars.` Optional name strap 1.5-5 s: `[Name] · [role], York Cars` (only as they ask). Word-timed captions, white Inter, no numbers |
| 12-21 s | Prompt, 13.5-22.5 s: inside the dispatch office, walking to the desk, a dispatcher seen from behind | "Mostly it's airport runs. People just want to know the car will be there on time." | Captions |
| 21-25 s | Prompt, 25-29 s: the dispatcher's hands type, then lift a radio from its charger | Voiceover: "It all comes through this desk." | **Review count card:** the exact line "Based on 2,695 reviews" cut from a fresh capture of yorkcars.co.uk on publish day (on the 22 Oct 2026 capture `assets/sites/yorkcars/now_desktop_full.png` it sits at crop `124, 5132, 196, 32`), on a navy `#0B1628` card, orange `#F7931E` underline under "2,695", slow push-in. Source line: `Google reviews shown on yorkcars.co.uk · captured [date]`. Context strip: `Context, not an agency result.` No stars, no "EXCELLENT", no reviewer names, no Google logo. If the count has changed, we show the new number exactly as captured |
| 25-28 s | edit: the website | - | `assets/sites/yorkcars/now_desktop.png` in a plain browser frame ( `yorkcars.co.uk` ), then the Locations and Airport Transfers menus open (captured on publish day), caption `A page for each of 15 suburbs and villages, and 13 airports` + `Context, not an agency result.`, source line `yorkcars.co.uk navigation · captured [date]` (counts re-checked on the capture) |
| 28-30 s | edit: end card over the site, darkened | - | Brand lockup. `York Cars · yorkcars.co.uk` only with their written permission. No "website by" line and no results claim (the site footer credits Xoom Media) |

No music under the lines; the yard, the door, the radios and the room carry it. Never on screen: "No.1", "#1", "largest fleet", "most trusted", a star average, reviewers' names, growth words, count-ups.

- **Testimonial:** the manager says what a Saturday night is like at York Cars and that customers mostly want airport runs with a car that turns up on time. They may reword the lines; no numbers, no "No.1" (not verified).

- **Before and after:** none in this cut. The site was rebuilt around Nov-Dec 2025, but its footer credits Xoom Media while Hulk's portfolio lists York Cars. For a before and after, York Cars confirms in writing who did the work, and you capture the old site in your own browser from the Wayback Machine (snapshot `20250916232610`, Sept 2025) beside today's site. We never mock up an old site.
- **Positive reviews:** the review widget's count ("Based on 2,695 reviews") is the one review figure we show, recaptured on publish day. For review quotes, send a dated screenshot of York Cars' own Google Business Profile reviews; we quote them word for word, names and photos blurred. Never generate or voice a review.

```
ASSET MAP
@Image 1: identity of the manager of a York private-hire taxi firm from the attached character sheet: face, hair, build and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
Late on a wet Saturday night in October, the manager of a York private-hire firm parks in the firm's yard, walks across it to the office talking back over their shoulder to the person filming behind them, and carries on inside to the dispatch desk, where a dispatcher works the radios. It starts on the car door landing shut, turns on two lines about the job, and ends close on the dispatcher's hands lifting a radio.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots on one phone, with HARD CUTS at second 13 (from the doorway into the office) and second 25 (to the dispatcher's hands at the desk). Real-time motion. No fades, no dissolves, no transition effects. The manager's clothes, the wet night and the phone camera look stay the same across every cut.

LOCATION MAP
Shot 1 (yard): the camera is a phone at chest height held by a person walking 1.5 metres behind the manager and half a metre to their right. Left of frame: a plain black people carrier parked side-on, its bonnet pointing away towards the office, its rear end behind the camera and out of frame, a plain metal fence beyond it with one older amber street lamp. Ahead in the right third: a single-storey office with a plain door 10 metres away, a cold white LED floodlight above the door, a window with a crooked blind glowing faint green-white. Wet black tarmac with puddles holding broken lamp reflections, a worn painted bay line, flattened leaves along the wall, a plain dark wheelie bin at the right edge.
Shot 2 (office): the camera stands just inside the door, facing into a room about 5 metres wide and 4 metres deep: a grey cable taped across the floor; an empty swivel chair with a dark coat over it; along the back wall the dispatch desk with handheld radios in chargers and two monitors turned away; the dispatcher at the right-hand end of the desk, back to the camera. Left wall: hooks with car keys on plain fobs, a counter with a kettle that has just boiled. Right wall: a dark window with rain on the glass and a crooked blind.
Shot 3 (desk): the camera at the dispatcher's right shoulder, angled steeply down at the grey laminate desk: two hands, a worn dark keyboard, three radios upright in chargers at the left, a tea-stained mug with a chipped rim, a biro, the feet of the monitor stands along the top edge.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-13s): the first frame already contains the manager mid-stride about 1.5 metres ahead of the camera and half a metre to camera-left of its line, torso facing the office door, head turned back over the right shoulder so the right side of the face shows in three-quarter view, eyes on the person filming. Their left arm trails back, fingertips just leaving the driver's door of the people carrier, which swings the last few centimetres shut. Keys in the right hand; a coiled radio earpiece in their left ear; a lanyard with the card turned to face the body.
Shot 2 (13-25s): the first frame of the shot already contains both people: the manager 1.2 metres ahead of the camera, a little left of centre, body facing into the room, head turned back over the right shoulder, three-quarter face to camera; the dispatcher small and soft at the back of the room, back to the camera, a headset over one ear, never turning round.
Shot 3 (25-30s): the first frame of the shot already contains the dispatcher's two hands on the desk, the fingers of the right hand resting on the keys, the radios upright in their chargers.

OPTICS
About 80° diagonal field of view, phone main-camera perspective, held at chest height 1 to 2 metres from the subject in shots 1 and 2 and 50 centimetres from the desk in shot 3. Environment visible to the frame edges, deep edge-to-edge
```

focus, no telephoto compression, no creamy bokeh.

CAMERA
Shots 1 and 2: handheld by a person walking slowly behind the manager: gentle vertical bob with each step, small horizon tilts corrected by hand, no gimbal smoothness; the camera never walks backwards and never overtakes the manager. Autofocus hunts once as the lit doorway opens up at second 11; at second 13 the auto white balance shifts from the yard's cooler light to the green tint of the office tubes and settles.
Shot 3: handheld and nearly still: faint micro-shake from breathing; the frame drifts a few centimetres left to follow the hand to the radio at second 27, then settles.

TIMELINE
0-1s (Shot 1): At second 0 the people carrier's driver's door lands shut with a heavy thunk; the vehicle rocks once on its suspension; the manager takes a full stride towards the office, head still turned back. End state: mid-stride, lips parted.
1-7s: At second 1 @Image 1 the manager says, in natural British English, "Saturday nights don't stop. Town, the station, the villages, then straight back into town.", unhurried, walking at an easy pace with the head half-turned back so the mouth stays visible, glancing ahead at the office door once mid-line. End state: line finished, head turning forward, about 4 metres from the door.
7-11s: They walk the last 4 metres facing the door; at second 8 one foot splashes through a shallow puddle; the floodlight picks out the drizzle on their shoulders. End state: at the door, left hand on the handle.
11-13s: At second 11 they pull the door open against its closer; pale green-white fluorescent light spills out across the step and the wet tarmac; they step through into the light. End state: their back in the bright doorway.
13-14s (Shot 2): HARD CUT at second 13 to inside the office. Behind the camera the door swings shut on its closer and the latch clicks; the manager turns back towards the camera. End state: three-quarter face to camera, lips parted.
14-20s: At second 14 the manager says, "Mostly it's airport runs. People just want to know the car will be there on time.", easy and unhurried, walking slowly towards the left end of the desk with the head half-turned back; mid-line they open the hand without the keys towards the room once. End state: line finished, about 1 metre from the desk.
20-25s: They reach the desk and stop; at second 22 they rest the right hand flat on the desk edge beside the radio chargers and lean a little weight onto it, glancing across at the dispatcher; at second 23 the dispatcher's chair creaks. End state: leaning on the desk, eyes on the dispatcher.
25-26s (Shot 3): HARD CUT at second 25 to the dispatcher's hands. Both hands still. End state: still.
26-27s: The right hand types a short burst of keystrokes and presses one last key firmly. End state: the right hand hovering over the keys.
27-29s: At second 27 the left hand lifts the nearest radio straight up out of its charger with a small click; the wrist dips with its weight; at second 29 the radio gives a short burst of crackle with a distant voice too broken to make out any words. End state: the radio held upright above its charger.
29-30s: Hold; ambience only.

PHYSICS
Each heel lands with weight and the body bobs; the jacket swings a beat behind; the keys chink; the puddle splash ripples outwards; drizzle darkens the shoulders; the office door's closer resists, so the arm braces to pull it; the desk takes the manager's weight and the radios rattle very slightly; the keys travel and click under the dispatcher's fingertips and the radio has real mass. The car has real weight: suspension settles after it stops, tyres flex on the kerb, road grime along the sills, rain beads on the bonnet, reflections of the grey sky distort across the panels.

LIGHTING
Shot 1: Cold white LED street lamps mixed with one older amber lamp further down the street are the only light; wet pavement reflects both; the face is lit from one side by the nearest lamp and falls into shadow on the other; a faint rim of lamp light separates the head and shoulders from the dark street. Here the amber lamp beyond the fence, camera-left, rims the back of the head and shoulders; the face turned back to the camera takes a soft glow off the wet tarmac; the cold floodlight above the door, ahead and camera-right, edges the far cheek and shows up the drizzle.
Shots 2 and 3: Fluorescent ceiling tubes are the key, flat-ish but real with a slight green-cyan cast; the dark window adds nothing; darker corners at the back of the room; the monitors face away and give off almost no light.
Natural skin from the reference, visible pores and fine texture, unretouched. Real skin texture on the dispatcher's hands, visible pores and fine hairs, a faint ink mark on the side of one finger.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: shot 1, a wet yard at night, drizzle on car roofs, a drainpipe running, a distant road hiss; shots 2 and 3, a small dispatch office at night, a fluorescent tube buzzing faintly, a radiator ticking, rain against the dark window, a radio hissing low.
Foley: the car door's thunk at 0 seconds; footsteps throughout the walk; a puddle splash at 8 seconds; the door closer's hiss at 11 seconds and the latch clicking shut behind the camera at 13 seconds; the chair creak at 23 seconds; keyboard clatter at 26 seconds; the charger's click at 27 seconds; radio crackle at 29 seconds with no words that can be made out.
Voiceover, shot 3 only: the manager's voice, off screen and not lip-synced to anyone in frame, close and easy, in natural British English. At second 26: "It all comes through this desk."
Dialogue: only the quoted lines, spoken by the manager at seconds 1 and 14, in natural British English; lips still when not speaking; the dispatcher never speaks; no other voices.
Sound from the phone's microphone: footsteps, a little wind outdoors, the voice close with a little reflection off the hard office walls.
No background music. No subtitles. At least 1 second of ambience-only before the first word.

FINAL FRAME

The dispatcher's left hand holding the radio upright above its charger, the right hand on the keyboard, the tea-stained mug between them.

POSITIVE CONSTRAINTS
Shot 1: Muted autumn colour as it really looks: wet slate greys, an overcast white sky, wet black tarmac, red-brick terraces and cream stucco, cold white LED and older amber street light; people in navy, grey and mid-blue everyday clothes; nothing saturated. Tonight the low cloud is dark, faintly lit by the town.
Shots 2 and 3: Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated. At this hour the window is black, with the room's tubes reflected in the wet glass.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
A plain black saloon or people carrier with no livery, no door lettering, no roof sign text, no decals. The front and rear number plates are angled away from the camera, out of focus, or hidden behind a foreground object. It waits at a kerb, a driveway or a drop-off zone, never on a rank. It stays parked in the firm's own yard.
The office door, walls, key fobs and radios are plain, with no signs, numbers, rota boards or names. Every monitor is turned away.
Shot 1: exactly one person. Shot 2: exactly two people, the manager and the dispatcher, who is seen only from behind. Shot 3: only the dispatcher's hands. No extra people.
Filmed handheld on a smartphone main camera: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.

# 06 · Client FAQ · Organic Fostering (organicfostering.co.uk)

| | |
|---|---|
| **Your format** | Client video 6: Client FAQ short, 20 to 30 sec |
| **Website** | organicfostering.co.uk |
| **Final length · ratio** | 30 s · 16:9 (service page) |
| **Attach** | @Image 1 = the Organic Fostering director's character sheet |
| **Prompts** | 1 (26 s) |

**What the finished video shows:** one question on screen, "What was it actually like working with Hulk?", answered by the agency's director at the table in their Manchester office on a wet morning, in three short lines. Between the answers the edit shows the real organicfostering.co.uk pages: the postcode check and the plain-English guides. Adults only: no children, carers, case files or allowance figures anywhere.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-1.5 s | edit: plain navy card | - | Question card from frame 1: `What was it actually like working with Hulk?` (Inter 600, white, on navy `#0B1628`; a plain card, never a comment bubble). AI label, small, lower left, to the end: `AI re-creation, made with [Name]'s permission. Their approved words, AI voice.` |
| 1.5-14.5 s | Prompt, 0.5-13.5 s: the director at the office table, mug in hand, a yellow city bus soft through the wet window | "Honestly, it was easy. They explained everything in plain English, no jargon." · "They listened to how we talk to families, and now the website sounds like us." | Name caption 2-5 s: `[Name], [role], Organic Fostering`. Word-timed captions, no numbers |
| 14.5-15.5 s | Prompt, 15-16 s: their hands, a pen ticks a blank notebook page | - | - |
| 15.5-17.5 s | edit: website | - | `assets/sites/organicfostering/now_areas_desktop_fu` crop `100, 940, 1240, 1010` (the "Check whether we cover your area" panel and postcode form), orange underline under "Ask us to check your area". Source line: `organicfostering.co.uk/areas-we-cover · captured 22 Oct 2026` (recaptured on publish day) |
| 17.5-21.5 s | edit: website | - | `assets/sites/organicfostering/now_blog_desktop_ful` crop `96, 200, 560, 640`, underline under "Our guides explain fostering in plain English"; the three newest guide titles slide up (crop `96, 1440, 1248, 160`, text only). Card: `61 pages · 32 plain-English guides` (counted from `assets/sites/organicfostering/sitemap_20261022.xml` strip `Site structure, not traffic results.` |
| 21.5-30 s | Prompt, 17.5-26 s: close, line 3, a half-smile, a nod, a sip of tea | "I'd recommend them. They just quietly get on with it." | Captions. Brand lockup small, bottom right, from 28 s. No "built by" line (who built the Sept 2026 rebuild is not confirmed) |

No music: room tone, rain, the bus and the mug carry it. Never on screen: the homepage captures (they show the allowance calculator and photos of children), any allowance or income figure, an Ofsted grade, "24/7", "No.1", traffic or enquiry results.

- **Testimonial:** working with the agency was easy and free of jargon, the website now sounds like the way they talk to families, and they would recommend the agency. The director may reword all three lines; no numbers. Keep line 2 only if the director confirms in writing that Hulk wrote or rewrote the site's copy; otherwise use "They listened to how we talk to families." at the same second, in the prompt and the script.

- **Before and after:** none in this video. There is no "before" capture yet and who built the Sept 2026 rebuild is not confirmed. For one, the client confirms Hulk's role in writing and you capture the old site in your own browser from the Wayback Machine. We never mock up an old site.
- **Positive reviews:** none on screen yet. If Organic Fostering has Google Business Profile reviews, send a dated screenshot; we quote them word for word, names and photos blurred, and never use any that name a carer or child. Never generate or voice a review.

```
ASSET MAP
@Image 1: identity of the director of a small fostering agency from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
On an overcast, wet late-October morning, the director of a small fostering agency sits at the table in their own office on a main road in Manchester and answers an interviewer's question about working with their marketing agency. It starts with a mug of tea held in both hands, turns on a small mark in a notebook, and ends close on a half-smile and a sip of tea.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots at the same table, with HARD CUTS at second 14 and second 17. Real-time motion. No fades, no dissolves, no transition effects. The room, their clothes, the mug, the notebook and the window light stay the same across every cut.

LOCATION MAP
A small office on a main road: the director sits at a plain table facing the camera; a large window fills the left half of the frame and reaches behind their right shoulder, rain beads on the glass, a wet main road outside soft and grey, a roller blind pulled a third of the way down and hanging slightly crooked, a radiator with chipped paint under the window. On the table: a plain pale-grey mug of tea, a plain closed notebook with a plain pen on it, a small potted plant with a few browning leaves. At the right edge of the frame the back of an empty office chair with a navy coat over it. The interviewer sits across the table, just off camera to the left.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-14s): the first frame already contains the director seated just right of centre, about 40 centimetres back from the table edge, upper body angled slightly towards camera-left, eyes resting just past the left edge of the lens on the interviewer, both hands holding the mug at chest height, elbows on the table edge, a thin curl of steam rising. Lips closed. The road outside is empty.
Shot 2 (14-17s): a high close shot of the table: the notebook now open with both pages blank, the director's right hand holding the pen with the nib near the margin, the left hand flat on the left-hand page, the mug soft at the left edge. The face is out of frame.
Shot 3 (17-26s): a close-up of the director from the same side, head and shoulders just right of centre, eyes just past the left edge of the lens, the right hand loosely round the mug below frame.

OPTICS
Shot 1: 47° diagonal field of view, standard normal lens character, camera on a tripod 2.5 metres away at seated eye height, natural proportions, the window and road readable but softly out of focus.
Shot 2: 47° diagonal field of view, camera 1.5 metres away at standing chest height, looking down at about 30 degrees; the hands and page sharp, the mug soft in front.
Shot 3: 29° diagonal field of view, short telephoto portrait lens character, camera 3 to 4 metres away, face sharp, background compressed and softly out of focus, close framing through lens reach.

CAMERA
Shots 1 and 3: locked off on a tripod with the faint micro-movement of a real head; focus on the eyes.
Shot 2: on the tripod, raised and tilted down; static.

TIMELINE
0-1s (Shot 1): Ambience only. They glance down at the mug, lift their eyes back to the interviewer and take a small breath. End state: lips parted.
1-7s: At second 1 @Image 1 the director says, in natural British English, "Honestly, it was easy. They explained
```

everything in plain English, no jargon.", unhurried and warm, the mug held low at chest height, glancing down once mid-sentence; on the last words they lean forward and set the mug down by their right hand. End state: the mug on the table, eyes back on the interviewer.
7-12s: At second 7 they say, "They listened to how we talk to families, and now the website sounds like us.", hands resting together on the table, one small open-palm gesture of the left hand well below the chin. At second 9 a yellow city bus passes along the road outside, a soft moving shape through the wet glass, gone by second 12. End state: the last word spoken, a small involuntary nod.
12-14s: They sit back a few centimetres, breathing, eyes on the interviewer. End state: settled.
14-15s (Shot 2): HARD CUT at second 14 to the table. The nib rests on the page. End state: still.
15-16s: The pen draws one small tick in the margin and one short line beneath it; no letters, words or numbers. End state: a tick and a line on a blank page.
16-17s: The right hand lays the pen down across the page. End state: the pen lying on the page.
17-18s (Shot 3): HARD CUT at second 17 to the close-up. A small breath in. End state: lips parted.
18-23s: At second 18 they say, "I'd recommend them. They just quietly get on with it.", unhurried, a glance down at the table mid-sentence and back up. End state: lips closing.
23-24s: A half-smile comes and fades with a small nod. End state: eyes drop to the mug.
24-26s: They lift the mug with their right hand, take one slow sip and lower it to chest height. End state: the mug at chest height, eyes back on the interviewer.

PHYSICS
The mug has weight and pulls the wrists down slightly; when it touches the table the tea shivers and settles; the cardigan sleeves slide back a little as they reach forward; a lanyard swings once and settles, the card turned to the body; the chair takes their weight and creaks as they sit back; steam bends and thins in the window light; the nib drags slightly on the paper and leaves real ink; outside, the bus throws a faint spray off the wet road.

LIGHTING
Soft overcast daylight from a large window camera-left is the only key; the right side of the face falls a stop darker with soft shadow under the cheekbone; the overhead office lights are on but weak, adding a faint cooler top light; the window itself is slightly overexposed. The darker side is the side of the face away from the window: camera-right, their left cheek.
Natural skin from the reference, visible pores and fine texture, unretouched; a little bobbling on one cardigan sleeve.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: a small office room tone, a radiator ticking, light rain on the window, occasional traffic on a wet main road muffled by the glass.
Foley: the mug set down with a soft ceramic knock at 6 seconds; a bus engine and tyres hissing on the wet road from 9 to 12 seconds, kept low under the voice; a chair creak at 13 seconds; the nib scratching the paper at 15 seconds; the pen laid down at 16 seconds; the mug lifted from the table at 24 seconds.
Dialogue: only the quoted lines, spoken by the director at seconds 1, 7 and 18, in natural British English; lips still when not speaking; no other voices.
Clean close dialogue as if from a clip-on microphone, natural room tone underneath, no echo.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
The director in close-up, mug at chest height after the sip, eyes on the interviewer, the wet window soft behind.

POSITIVE CONSTRAINTS
Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
Adults only: no children, no photos of children, no case files, no names on any board or paper.
Exactly one person visible. No extra people.
Filmed on a handheld documentary video camera in available light: natural colour with a restrained grade, fine even digital grain, soft highlight roll-off on bright windows, real depth of field with a gently soft background.

# 07 · "What I learned from SEO" selfie · Zentro (zentro.co.uk)

| | |
|---|---|
| **Your format** | UGC 7: "What I learned from SEO" selfie clip, 20 sec |
| **Website** | zentro.co.uk (laptop and mobile repair, refurbished devices, business IT support) |
| **Final length · ratio** | 22 s · 9:16 (Reels, TikTok, Shorts) |
| **Attach** | @Image 1 = the Zentro owner's character sheet |
| **Prompts** | 1 (20 s) |

**What the finished video shows:** at the end of the day the Zentro owner films themself at their repair bench and shares the one thing they learned about how people search: hardly anyone types "phone repair", they type the exact model and what's broken, which is why booking on zentro.co.uk asks for your exact model. The edit shows the real booking steps on the site. No numbers: no data was supplied for Zentro.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-7 s | Prompt, 0-7 s: selfie at the repair bench, a phone in a repair clamp, a laptop open on its back | "What I learned about Google? Hardly anyone types phone repair. They type the exact model and what's broken." | Hook text by 0.5 s, top band: `What I learned from SEO` in Inter, with Zentro's orange `#FF5A00` as a thin underline. AI label, lower left, throughout: `AI re-creation, made with [Name]'s permission. Their approved words, AI voice.` Word-timed captions. Name caption 1-4 s: `[Name], Zentro` as they ask |
| 7-10 s | Prompt, 7-10 s: they glance at the bench and set a screwdriver down | - | Three example search chips slide in, written by us as examples (labelled `Example searches`): `iPhone 13 screen repair` · `Dell XPS battery replacement` · `Galaxy S22 charging port`. No numbers, no claim that these are Zentro's rankings |
| 10-14 s | Prompt, 10-14 s: back to the lens | "That's why booking on our site asks for your exact model." | Website capture captured on publish day: zentro.co.uk's booking steps (device, brand, range, exact model, repair) in a phone frame labelled `zentro.co.uk`, each step ticking on in time with the line. Until then, `assets/sites/zentro/now_mobile.png` |
| 14-20 s | Prompt, 14-20 s: they put the phone in the clamp down, switch the bench lamp off and give a small nod | - | Captions clear. End-card lockup from 19 s (Hulk Marketing, or Hulk Marketing · part of Google Ranker Pro). `Zentro · zentro.co.uk` only with their written permission |
| 20-22 s | edit: end card | - | Lockup. No "website by" line (no agency credit appears on the site) |

No music under the lines; the workshop sound carries it. A sparse licensed bed may sit under 14-22 s. Never on screen: rankings, traffic numbers, the site's "5,000+ happy customers" or "4.8/5 (2,560+ reviews)" claims, device brand logos.

- **Testimonial:** the owner's lesson from SEO, in their own words: people search the exact model and the fault, so their booking asks for the exact model (true of zentro.co.uk's booking journey today). They may reword both lines.
- **Before and after:** none in this video. There is no "before" capture and no agency credit on the site, so first confirm in writing what Hulk did for Zentro. For a website before and after, capture the old site in your own browser from the Wayback Machine (if the first archived capture is already today's design, there is no "before"). We never mock up an old site.
- **Positive reviews:** none on screen. Never use the site's review carousel or its "4.8/5 (2,560+ reviews)" and "5,000+ happy customers" claims: no review platform is named and the quotes are undated. If Zentro has Google Business Profile reviews, send a dated screenshot; we quote them word for word, names and photos blurred. Never generate or voice a review.

ASSET MAP
@Image 1: identity of the owner of a small laptop and phone repair business from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
At the end of an overcast late-October working day, the owner of a small laptop and phone repair business stands at their repair bench and films themself on their phone's front camera, sharing one thing they learned about how people search on Google. It starts mid-thought at the bench, turns on a glance at the repairs in front of them, and ends with them switching off the bench lamp for the day.

FORMAT MODE
SINGLE CONTINUOUS TAKE.

LOCATION MAP
A small, working repair workshop. The owner stands at a long bench; a large window is on camera-left, beside and a little behind them, its edge just in frame at the left. On the bench, below and in front of them: a grey anti-static mat; a phone with its back cover off held in a small repair clamp, its screen dark; a laptop lying open on its back with its bottom panel removed, the internals showing as fine detail with nothing readable; a small stand of precision screwdrivers; a magnetic tray of tiny screws; tweezers; a soldering iron resting in its stand with a thin wisp rising from its tip; a warm articulated bench lamp with a magnifier, switched on, pooling light on the mat. Behind them: plain unlabelled parts drawers on a wall shelf and a coiled charging cable hanging half off the shelf edge; at the left edge, a mug of cold tea with a tea ring on the windowsill, rain on the window glass, a grey sky beyond.

FIRST FRAME AND SPATIAL BLOCKING
The first visible frame already contains the owner at arm's length on the front camera: head and shoulders in the upper-middle of the vertical frame, a little right of centre, the top of the head close to the top edge; the bench and the repairs visible in the lower third of the frame, the lamp's warm pool at the bottom edge. The phone is in their outstretched right hand; their right upper arm runs out of the lower-left edge. Their left hand rests on the edge of the bench. Eyes on the screen just below the lens; lips parted, mid-breath.

OPTICS
About 80° diagonal field of view, phone front-camera perspective, lens 40 to 55 centimetres from the face at arm's length, slightly above eye level. The face sits close and slightly enlarged at the centre, the bench and workshop visible to the frame edges and mostly in focus, straight lines stay straight, no portrait bokeh.

CAMERA
The phone is held in the owner's own outstretched right hand; the frame moves with their arm: slight handheld micro-shake, small drifts as they gesture with the other hand, a natural re-grip once at second 9.
Their eyes flick between the lens and the screen image of themselves, as people do on a front camera.
Auto exposure breathes slightly when their arm drifts and more of the bright window enters the left of the frame, and again when the bench lamp goes off at second 17, then settles.

TIMELINE
0-1s: Ambience only; a small breath in. End state: lips parted, about to speak.
1-7s: At second 1 @Image 1 the owner says, in natural British English, "What I learned about Google? Hardly anyone types phone repair. They type the exact model and what's broken.", conversational and a little amused, with one small open-hand gesture of the left hand low over the bench on the word "model". End state: line finished, left hand back on the bench edge.
7-10s: They glance down at the phone in the clamp, pick up a small screwdriver with the left hand, look at it, and set it back in its stand; at second 9 they re-grip the filming phone and the frame jolts slightly and settles. End state: eyes back on the screen.
10-14s: At second 10 they say, "That's why booking on our site asks for your exact model.", plainly, with a small nod at the end. End state: lips closed, a half-smile.
14-17s: Their left hand reaches down and lifts the clamped phone a few centimetres, checks it, and sets it back on the mat; then the hand moves to the bench lamp's switch. End state: fingers on the lamp switch.
17-18s: At second 17 they switch the bench lamp off; the warm pool on the mat disappears and the bench falls into the cooler window light. End state: the lamp off.
18-20s: They give the lens a small nod, the half-smile fading; ambience only.
```

PHYSICS
The clamp's grip holds the phone firmly and it lifts with real weight; the screwdriver clicks into its stand; the thin wisp from the soldering iron rises, bends and breaks up in the air from the window; the owner's sleeve shifts as the left hand moves; the lamp's arm stays where it is when switched off; rain beads on the window gather and run down in short jerks.

LIGHTING
Soft overcast daylight from a large window camera-left is the key on the face; the right side of the face falls a stop darker with soft shadow under the cheekbone; the overhead workshop lights are on but weak, adding a faint cooler top light; the window itself is slightly overexposed. The darker side is the side of the face away from the window: camera-right, their left cheek. The warm bench lamp pools light on the mat and lifts the hands and the underside of the chin a little until it is switched off at second 17.
Natural skin from the reference, visible pores and fine texture, unretouched; a small nick on one knuckle from work. Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: a small workshop at the end of the day: rain on the window, a radiator ticking, a faint fan hum from a bench power supply, distant traffic.
Foley: the screwdriver lifted and clicked back into its stand at 8 seconds; a fabric rustle and a small handling knock at the re-grip at 9 seconds; the clamped phone set back on the mat at 16 seconds; the lamp switch's click at 17 seconds.
Dialogue: only the quoted lines, spoken by the owner at seconds 1 and 10, in natural British English; lips still when not speaking; no other voices.
Sound recorded by the phone's built-in microphone at arm's length: close voice with a little room reflection, faint handling noise when the grip shifts.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
The owner on the front camera at the bench with the lamp off, a small nod, the cool window light on the repairs below.

POSITIVE CONSTRAINTS
Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
Every laptop and phone is unbranded: no logos on lids or backs, no visible model names; every screen is dark or out of frame; the parts drawers have no labels.
Exactly one person visible. No extra people.
Filmed handheld on a smartphone front camera at arm's length: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.

**What the finished video shows:** the owner, at his kitchen table before his first run, films his own laptop on his phone and talks us through one of his real searches: "coventry airport transfers", page one on average (position 6.0) and clicked about one in ten times it is shown (10.5%), over the last three months. We key his real Search Console screenshot into the green laptop screen, so it reads as a genuine phone screen recording. Hook: the search and its numbers on screen in the first second.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back. The voice is off screen, so we can move each line to where it fits.

| Time | Picture | Spoken (voiceover, his voice) | Visuals we add |
|---|---|---|---|
| 0-0.8 s | edit graphic: hook card | (line 1 starts at 0.2 s) | Exact crops of `assets/gsc/coventryairporttaxis247_gsc_3m_full.png` row 4 query cell `24, 1051, 500, 49`, column headers `824, 847, 518, 57`, row 4 numbers `824, 1051, 518, 49` (`8 · 76 · 10.5% · 6.0`) on a navy card. Chip: `coventry airport transfers · avg 6.0 · 10.5% CTR`. Source line under every receipt: `Google Search Console · coventryairporttaxis247.co.uk · 19 Jul–18 Oct 2026` |
| 0.8-12 s | Prompt, 1-12.2 s: his phone films the laptop; we key the real Search Console page into the green screen and scroll it with his fingers; a thin orange outline round row 4 from 4.5 s | "Coventry airport transfers. On Google we're averaging position six over the last three months." then "That's page one. And about one in ten times it's shown, someone clicks." (prompt, from 1 s and 7 s) | Row 4 crops in the top band; orange underline under `6.0` on "six", sliding to `10.5%` on "one in ten". Context chip: `Positions 1–10 are page one.` Voice tag 0.8-4 s: `[First name], owner, Coventry Airport Taxis 247`. AI label, lower left, throughout: `AI re-creation, made with [Name]'s permission. His approved words, AI voice. Real data.` Word-timed captions (numbers as numerals) |
| 12-18 s | edit graphic: receipt card over the prompt's frame at 12 s, blurred and dimmed | "Small numbers. Seventy-six times shown, eight clicks." (prompt, from 15 s; moved under the card) | The same row 4 crops, larger; underline under `76`, then under `8`. Chip: `Small numbers: 76 times shown · 8 clicks` |
| 18-24 s | Prompt, 15-21 s: close on the lower half of the screen, one tap; we key in rows 3 and 4 and outline row 3 on the tap | "Coventry airport taxi, averaging seven." (prompt, from 19 s) | Row 3 crops `24, 1002, 500, 49` and `824, 1002, 518, 49` (`8 · 95 · 8.4% · 7.0`); underline under `7.0` on the tap. Chip: `coventry airport taxi · avg 7.0` |
| 24-30 s | Prompt, 22-28 s: the phone swings off the laptop to the rainy window and the grey mug | "They're three-month averages. But they're the jobs I want." (prompt, from 23 s) | Context strip: `Average position over 3 months, 19 Jul–18 Oct 2026.` and `One three-month period; no earlier period to compare.` End card from 28 s: brand lockup, optional `No ranking guarantees.` No "website by" line (the site footer credits SMEK) |

Sound: his voice over the clips' own kitchen sound (rain, fridge, trackpad). No music, or one sparse licensed bed very low. Never on screen: "No.1", "#1", "just hit", growth words, up-arrows, Google's logo or colours on our graphics.

- **Testimonial:** the owner reads his own Google numbers for "coventry airport transfers" and "coventry airport taxi" and says these are the jobs he wants. He may reword the lines, but the numbers stay exactly as written.

- **Before and after:** none in this cut. The screenshot covers one three-month period only, so we never say "just hit" or "up". Send a Search Console Compare export (last 3 months vs the previous 3 months) and we can make an honest then-and-now version of this clip.
- **Positive reviews:** none in this cut. Send a dated screenshot of Coventry Airport Taxis 247's own Google Business Profile reviews; we quote them word for word with names and photos blurred. Never use the site's review widget (it shows a Slough business, Global Cars 247) or the duplicated "Ali" reviews, and never generate a review.

```
ASSET MAP
@Image 1: the right hand and forearm of the owner of a small Coventry airport-taxi firm from the attached character sheet: skin, knuckles, nails and the sleeve at the forearm. 100% matches the reference. Hand and forearm only; the face is never in frame. Do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
On a wet, overcast morning, the owner of a small Coventry airport-taxi firm sits at his kitchen table before the first run of the day and films his own open laptop on the phone in his left hand, talking over it off camera about two of his Google searches. It starts with two slow scrolls, turns on one tap on the trackpad, and ends with the phone swinging up to the rainy window.

FORMAT MODE
CONTROLLED MULTI-SHOT SEQUENCE: three shots on his own phone, with HARD CUTS at second 14 and second 22, like a short phone screen recording he has trimmed himself. Real-time motion. No fades, no dissolves, no transition effects. The table, the laptop, the mug, his sleeve and the window light stay the same across every cut.

LOCATION MAP
A small kitchen on a wet morning. A worn wooden kitchen table; an open laptop on it, square in front of him; to the left of the laptop a plain grey mug with a chipped rim, a thin thread of steam rising from it; a white charging cable running from the laptop's left side across the table and over its edge; a set of car keys on a plain black fob at the right. In the wall to the left of the table a large window with rain on the glass, a plain white roller blind pulled a third of the way down and hanging slightly crooked, wet roofs and back walls beyond, soft and grey. The pale grey kitchen wall behind the table. Window light from camera-left.
Shot 1: the phone in his left hand at chest height, 55 centimetres from the screen, from his seat just above and behind the keyboard, angled slightly down; the screen a little above centre and filling about two thirds of the frame width; the mug cut in half at the lower-left edge, 25 centimetres from the lens.
Shot 2: the phone 40 centimetres from the screen, angled down over the keyboard: the lower half of the screen across the top fifth of the frame, the keyboard filling the middle, the trackpad and palm rest below, the mug's chipped rim just entering the lower-left corner.
Shot 3: the phone first aimed down at the laptop's lower-left corner from 40 centimetres away, then turning up and to the left towards the window, about 1 metre away.

FIRST FRAME AND SPATIAL BLOCKING
Shot 1 (0-14s): the first frame already contains the laptop with its green screen, all four corner dots visible, and his right hand on the trackpad. Only one bare hand is in frame, entering from the bottom-right edge, the forearm in a plain navy jumper sleeve pushed up to the elbow, five fingers, the index and middle fingers resting on the lower half of the trackpad. His face is never in frame. The hand stays below the keyboard's top row and never touches or crosses the screen.
Shot 2 (14-22s): the first frame of the shot already contains the lower half of the green screen with both lower corner dots, the keyboard, the trackpad and his right hand resting at the lower-right corner of the trackpad, the index finger lifted a few millimetres.
Shot 3 (22-28s): the first frame of the shot already shows the lower-left of the laptop: the bottom-left corner of the green screen with its corner dot in the upper-right of the frame, the left half of the keyboard below it, the grey mug fully in frame at the lower-left with steam rising. No hands in this shot.

OPTICS
About 80° diagonal field of view, phone main-camera perspective, 40 to 55 centimetres from the laptop in shots 1 and 2, swinging to about 1 metre from the window in shot 3. Deep focus across the screen and keyboard, the mug nearest the lens slightly soft, no telephoto compression, no creamy bokeh.
```

CAMERA
Shots 1 and 2: the phone held in his own left hand with the elbow resting on the table: near-static, slight handheld micro-shake and the small rise and fall of his breathing, never gimbal-smooth. In shot 1 the autofocus hunts once at second 5, then locks.
Shot 3: one slow, continuous swing up and to the left from second 23 to second 26 with a small overshoot and a correction back, then held with slight micro-shake; a mild lens flare and a veil of haze when the lens points at the bright window; exposure dips, then settles on the rain beads.

TIMELINE
0-1s (Shot 1): Ambience only. The hand rests on the trackpad; the screen is flat green. End state: still.
1-4s: The index and middle fingers slide slowly up the trackpad about 4 centimetres, lift, drop back and slide up once more: one slow two-stroke scroll; the voiceover starts at second 1. End state: the two fingers near the top of the trackpad.
4-7s: The fingers lift a few millimetres and settle again; at second 5 the autofocus hunts: the screen edges and corner dots soften for a moment, then snap back sharp. End state: sharp, fingers resting.
7-10s: The two fingers slide down the trackpad once, a short slow stroke of about 2 centimetres, and stop. End state: fingers resting mid-pad.
10-13s: The hand lifts off the trackpad and settles flat on the palm rest to its right, the wrist brushing the metal; at second 11 the left hand re-grips the phone and the frame dips a few millimetres and recovers. End state: the hand on the palm rest.
13-14s: Hold; ambience only. End state: unchanged.
14-15s (Shot 2): HARD CUT at second 14 to the close angle over the keyboard. The hand rests at the lower-right corner of the trackpad. End state: still.
15-17s: The index finger moves slowly to the centre of the trackpad and hovers a few millimetres above it. End state: the fingertip hovering.
17-19s: At second 18 the index finger taps the trackpad once, a single firm press; the pad clicks and the lid gives the faintest shiver on its hinge. End state: the fingertip resting on the pad.
19-22s: The finger lifts and the hand slides back to the lower-right corner of the trackpad, the wrist brushing the palm rest; hold. End state: the hand at rest.
22-23s (Shot 3): HARD CUT at second 22 to the laptop's lower-left corner and the mug. End state: still, steam rising.
23-26s: The phone swings slowly up and to the left: the green corner slides out of the right edge of the frame, the mug drops into the lower third and the rainy window rises into the upper two thirds; the swing overshoots a few degrees and corrects back; a mild flare as the lens meets the window. End state: the window in the upper two thirds, the mug in the lower third.
26-28s: Hold with slight micro-shake; the steam rises against the bright glass; one raindrop runs down the glass. End state: the final frame.

PHYSICS
The fingertips flatten slightly against the trackpad and the skin creases at the knuckles; the pushed-up sleeve creases at the elbow; the laptop never moves and the lid holds its angle; the steam rises from the mug, breaks up and drifts left, never across the screen; rain beads on the window gather and run down in short jerks; the phone moves with the weight of a hand and wrist when it swings.

LIGHTING
Soft overcast daylight from a large window camera-left is the only key; the right side of the hand and the keyboard fall a stop darker with soft shadow; the kitchen ceiling light is on but weak, adding a faint warmer top light; the window itself is slightly overexposed. The laptop screen gives off almost no light.
Real skin texture with visible pores and fine hairs on the back of the hand; a slightly chipped nail on one thumb.
The pushed-up sleeve of a plain navy jumper; no logos, no printed text. Only his hand and forearm are in frame, and his face is never seen.
The hand relaxed with natural knuckle creases and veins; five fingers.

AUDIO
Ambience: kitchen room tone, a fridge humming faintly, rain pattering on the window to the left and growing a little louder as the phone turns towards it in shot 3, a radiator ticking, distant traffic on a wet road.
Foley: fingertips whispering on the trackpad from 1 to 4 seconds and from 7 to 8 seconds; the wrist brushing the palm rest at 10 and 20 seconds; the phone case rubbing the fingers at the re-grip at 11 seconds; one soft trackpad click at 18 seconds.
Voiceover: the voice of the owner of a small Coventry airport-taxi firm, off screen and not lip-synced to anyone in frame, recorded close to the phone, unhurried and plain, like showing a mate something on a screen, in natural British English. At second 1: "Coventry airport transfers. On Google we're averaging position six over the last three months." At second 7: "That's page one. And about one in ten times it's shown, someone clicks." At second 15: "Small numbers. Seventy-six times shown, eight clicks." At second 19: "Coventry airport taxi, averaging seven." At second 23: "They're three-month averages. But they're the jobs I want." Only these words; no other voices. The ambience ducks a little under the voice.
Sound from the phone's microphone: close room tone, faint handling noise when the grip shifts, the rain a little thin and distant.
No background music. No subtitles. At least 1 second of ambience-only at the head and the tail.

FINAL FRAME
The rainy kitchen window in the upper two thirds of the frame with the crooked blind across its top, the grey mug in the lower third with steam rising against the bright glass, the frame held with slight micro-shake.

```
POSITIVE CONSTRAINTS
Muted, lived-in indoor colour as it really looks: off-white and pale grey walls, worn wood and grey laminate, cool daylight at the window, a warm pocket of light from a lamp or ceiling bulb; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
In shot 1, the laptop screen shows a flat, uniform, matte chroma-green fill from edge to edge, evenly lit, with no interface, no text, no reflections and no glare; all four corners and the bezel stay visible, with one small dark dot in each corner of the green. The screen gives off almost no light. In shot 2 the visible lower half of the screen shows the same flat green, with one small dark dot in each of its two lower corners. In shot 3, while it is in frame, the visible corner shows the same flat green with its dot.
The keyboard's key legends are worn and too small to read; the laptop has no logo and no stickers; the grey mug is plain, with no print.
Exactly one person, seen only as one hand and forearm; no face and no reflection of a face anywhere. No extra people.
Filmed handheld on a smartphone main camera: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.
```

# 09 · Reaction clip · Leam Taxis (leamingtonspa-taxis.co.uk)

| | |
|---|---|
| **Your format** | UGC 9: Reaction clip, 15 sec |
| **Website** | leamingtonspa-taxis.co.uk |
| **Final length · ratio** | 15 s · 9:16 (Reels, TikTok, Shorts) |
| **Attach** | @Image 1 = the Leam Taxis owner's character sheet |
| **Prompts** | 1 (15 s) |

**What the finished video shows:** parked up between jobs, the Leam Taxis owner opens his monthly report on his phone, filmed by a second phone propped on the dashboard. He reads, laughs once and says "Twenty-five" to himself: September 2026, 25 calls from his Google Business Profile, the best of the six months shown. It stitches with video 3.

## Script

Draft wording: the client must confirm these lines are true and in their words before you generate. The visuals column is what we add in the edit when you send the clips back.

| Time | Picture | Spoken | Visuals we add |
|---|---|---|---|
| 0-1 s | edit: 1 s of video 3's front-door shot, c03 prompt about 14-15 s (his "...Twenty-five") | (from video 3) | The September tooltip crop `735, 278, 100, 55` of `assets/gsc/leamingtonspa_gbp_calls_may-oct2026.png` ("25 · September 2026") on screen by 0.8 s. AI label, lower left, throughout: `AI re-creation, made with [Name]'s permission. His approved words, AI voice. Real data.` |
| 1-13 s | Prompt, 1-13 s: in his parked car, reading his report on his phone; a laugh; "Twenty-five"; he looks out at the rain; a second line | "Twenty-five." (prompt, 5 s) · "September. Best of the lot." (prompt, 10 s) | On "Twenty-five": the tooltip crop punches in to the top band with an orange underline and a soft tick; source line `Calls made from your Business Profile · September 2026`. From 9 s the headline and chart crop `15, 165, 910, 310` slides up under it with the caption `September: 25 calls, the best of the six months shown.` and the strip `Leam Taxis' Business Profile, confirmed by the owner` |
| 13-15 s | edit: end card over his last frame | - | `114 calls May–Oct 2026 (October part month).` Lockup. Website: `assets/sites/leamingtonspa-taxis/now_mobile.png` in a small phone frame |

No music; rain on the roof carries it. Never on screen: "No.1", "#1", "best month ever", "since May", growth words, up-arrows.

- **Testimonial:** a private moment of reaction: he reads September's calls in his report and says "Twenty-five", then "September. Best of the lot." The only number is twenty-five; he may change the second line or skip it.
- **Before and after:** none in this clip; the honest frame is "the best of the six months shown". For a before and after, send a Business Profile Calls screenshot for Nov 2025–Apr 2026 with the profile name visible. Confirm first that the 114-calls profile is Leam Taxis'.
- **Positive reviews:** none here. Send a dated screenshot of Leam Taxis' own Google Business Profile reviews for his other videos; never use the six undated website testimonials, and never generate a review.

ASSET MAP
@Image 1: identity of the owner of a small Leamington taxi firm from the attached character sheet: face, hair, build, hands and clothing. 100% matches the reference. Use the person only; do not copy the sheet's grey background, panel layout, labels or its flat, even sheet lighting.

SCENE CONTEXT
On a wet late-October afternoon the owner of a small Leamington taxi firm sits in his own car, parked at the kerb of a terraced street between jobs, engine off, reading his monthly report on the phone in his hands while a second phone propped on the dashboard films him. He starts reading, turns on a short laugh and one quiet word, and ends with one more line, half to himself.

FORMAT MODE
SINGLE CONTINUOUS TAKE.

LOCATION MAP
Camera: a phone propped in a dashboard mount just left of the steering wheel, at his chest height, about 55 centimetres from his face, pointing slightly up at the driver's seat. Foreground: the top arc of the steering wheel crossing the lower part of the frame, close to the lens. Midground: the owner in the driver's seat, seatbelt off and hanging slack from the pillar beside his right shoulder. Background: the grey fabric headrest; at screen-left, behind his right shoulder, the driver's door window beaded with rain, the wet road and red-brick terraced house fronts soft beyond it; at screen-right, the edge of the empty passenger seat with a crumpled paper receipt lying face-down on it, and the brighter passenger-side windows with the wet pavement and a low front wall beyond. A charging cable hangs in a loose loop across the lower-right corner.

FIRST FRAME AND SPATIAL BLOCKING
The first visible frame already contains the owner in the driver's seat: his head and shoulders in the upper part of the vertical frame, a little left of centre, the top of his head close to the top edge. His forearms rest on the top of the wheel; he holds a phone in a plain dark case low in both hands just above the rim, its back to the camera and its screen facing him, thumbs on the lower edge of the screen. Torso faces the camera; eyes down on the phone; lips closed.

OPTICS
About 80° diagonal field of view, phone front-camera perspective, 50 to 70 centimetres from the face. The face close and natural, the cabin and the windows visible to the frame edges and mostly in focus, straight lines stay straight, no portrait bokeh.

CAMERA
The phone is propped in a mount at chest height, 50 to 70 cm from the face; the frame is static except for faint vibration when the surface is touched or a car door closes.
Framing is a little off-centre, slightly low, the top of the head close to the top edge.
Auto exposure breathes slightly when he turns his head towards the bright passenger-side window, then settles.

TIMELINE
0-1s: Ambience only. He reads, thumbs still, eyes on the phone. End state: still, reading.
1-4s: His right thumb scrolls up once; he pauses, his eyes stopping on one spot; his thumb scrolls back down and he reads the same place again, his head tilting a few degrees forward. End state: eyes fixed on one spot, lips closed.
4-6s: He breathes out through his nose in one short laugh, his shoulders lifting once, and at second 5 @Image 1 the owner says quietly to himself, in natural British English, "Twenty-five.", without looking up. End state: lips still, a half-smile, eyes on the phone.
6-9s: His left hand leaves the phone and rubs the back of his neck; at second 7 it drops back to the top of the wheel and he turns his head to his left and looks out through the passenger-side window at the rain, blinking once. End state: looking out of the window, the phone low in his right hand.
9-13s: He turns back towards the phone, and at second 10 he says, half to himself, "September. Best of the lot.", with a small shake of the head and the half-smile coming back. End state: lips closed, eyes on the phone.
13-15s: He lowers the phone to his lap and leans his head back against the headrest; ambience only. End state: head back, eyes half-closed, a faint smile.

PHYSICS
The seat fabric dips under his weight and creaks as he turns; his forearms press on the top of the wheel; the fleece creases at the elbow when he rubs his neck; the phone has weight in his hand and tips slightly as he lowers it; rain beads on the windows gather and run down in short jerks; the car does not move.

LIGHTING
Flat overcast daylight through the windscreen is the only key, soft and slightly cool; the side window camera-right adds a brighter edge on that cheek; the cabin roof and footwell fall into soft shadow; the windscreen itself is slightly overexposed. The phone screen faces away from the camera; its cool white glow lights the face from below, brighter on the chin and under the nose. The glow is faint against the daylight and slips off his face when he turns away.
Natural skin from the reference, visible pores and fine texture, unretouched.
Hands relaxed with natural knuckle creases and veins; five fingers each, fingers not touching the face during speech.

AUDIO
Ambience: steady rain on the car roof, water running in the gutter outside, a distant car hissing past on a wet road.
Foley: a short breath-laugh through the nose at 4 seconds; a fleece rustle at 6 seconds; a soft creak of the seat as

```
he turns at 7 seconds; a car door shutting somewhere down the street at 8 seconds, faint; the seat creaking as he leans back at 13 seconds.
Dialogue: only the quoted lines, spoken by the owner at seconds 5 and 10, in natural British English, quietly and to himself; lips still when not speaking; no other voices.
Sound recorded by the phone's built-in microphone: close voice with a little car-cabin reflection.
No background music. No subtitles. At least 1 second of ambience-only before the first word and after the last word.

FINAL FRAME
The owner with his head back against the headrest, the phone lowered, a faint smile, rain on the windows either side.

POSITIVE CONSTRAINTS
Muted colour inside a parked car as it really looks: a charcoal dashboard and grey seat fabric, rain beads on the glass, the world outside soft and grey; people in navy, grey and mid-blue everyday clothes; nothing saturated.
No on-screen text, captions or subtitles. All signs, labels, mugs, clothing, papers and screens are plain or turned away, with no readable words, logos or numbers. Number plates are not readable.
The phone in his hands never shows its screen to the camera.
Exactly one person visible. No extra people.
Filmed on a smartphone front camera propped in a mount at chest height: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.
```

If the result looks too clean, change only the last line to: `Filmed handheld on a smartphone front camera at arm's length: small-sensor look with deep focus, slight edge over-sharpening, faint sensor noise in the shadows, auto exposure and auto white balance as recorded, ungraded colour.`
