Bodyrade: “Locked In Fresh.”

3D cinematic static post · Instagram and Facebook feed · 1080 × 1350 (4:5) · the Mixology Bottle, exploded

CONCEPT

The idea

The Mixology Bottle, taken apart in mid-air. On the same dark navy set as your video, the cap, the capsule, the bottle and the base float apart on one straight line, like a product engineer’s exploded drawing brought to life. The capsule in the middle glows with Orange & Mango powder, the only warm light in the frame.

Each part gets one thin yellow leader line and one job, based on your website. A small card hanging off the capsule lists the exact 5-in-1 formula. The headline is your own line from the website: **LOCKED IN FRESH.**

HEADLINE

LOCKED IN FRESH.

What I found

- **Website (bodyrade.com):** the bottle works in four steps: load the capsule from the sachet or tub, insert it onto the bottle’s neck, open the base and fill with ice-cold water to the line, then open the cap and shake. The site lists the benefits as “Airtight compartments”, “No clumping, no potency loss” and “Mix it only when you’re ready to lift”. Each 10g serving has 5g Creatine, 2.5g Citrulline Malate, 1.5g Beta-Alanine, 200mg Caffeine and 200mg L-Theanine. The flavours are still “coming soon”, so the call to action stays “Register for a sample”.
- **Your earlier concept, “Twist. Drop. Fresh.”:** it shows the moment of use, with the bottle assembled and the capsule dropping. It noted exploded technical views as a Pinterest trend but didn’t use them. This post shows the other half of the story, the engineering, starting from the exploded-view render in your reference pack.
- **Pinterest:** exploded-view product posters (headphones, speakers, cameras, phones, even a water bottle) are a popular format: parts stacked on one axis, thin leader lines and small spec labels. Pre-workout ads, by contrast, are almost all a tub with fire, smoke, splashing fruit or a shouting athlete. None of the pre-workout ads in my search used one.

Why it works

- **It shows how it works in one look.** People can see where the powder lives, where the water goes and why the two never meet until you open the cap.
- **It earns a save.** People save “how it’s made” images to study later, and the slow read keeps them on the post longer.
- **It stays on-brand.** The navy set, cold blue light, Bodyrade yellow and the flavour colour tie it to the video and your earlier concept, while the yellow-first headline, eyebrow and pill footer give it its own look.
- **It’s new for the feed.** It’s the first concept in this campaign to show every part of the bottle and the full formula in one image.

LAYOUT PREVIEW

1. **LOCKED IN FRESH.** Your website's own line in heavy italic, yellow first this time, then white, with "Sealed and separated until you twist." beside it.
2. **The exploded bottle.** Loop cap, capsule (a slim tube under one ribbed collar), a tall empty bottle with a printed fill line, and the base, on one dashed axis with even gaps.
3. **Callouts 01–04.** One job per part, in a few words each, based on your website.
4. **The 5-in-1 card.** The exact formula per 10g serving, hanging off the capsule, with the caffeine warning underneath.
5. **One warm light.** The Orange & Mango powder glows inside the capsule; everything else is cold blue.
6. **Sign-off.** The real logo file and a yellow pill: "Register for a sample · bodyrade.com", which works on Facebook too.

This preview is a quick vector sketch for layout and copy. The final post is a high-resolution 3D render of the real bottle parts.

VISUAL DIRECTION

- **Set:** the navy-to-black backdrop and cold blue glow from your video, with a faint blueprint grid and a few dimension ticks at very low opacity.
- **Camera:** straight-on with a gentle three-quarter turn so the threads show. Everything is sharp, as in a technical render.
- **Parts:** four parts on one vertical axis with equal gaps, perfectly aligned. Nothing tilts or spins: the calm order is what makes exploded views satisfying. Thin yellow leader lines end in a small dot on each part; add them in design as crisp vector lines.
- **Light:** a cold blue rim light from behind, a soft top light on the black parts so the ribs read, and the orange glow from the capsule as the only warm accent.
- **Colour:** navy and black, Bodyrade yellow #FDCF09 (sampled from your logo file) and the flavour colour. Swap the powder colour for crimson (Sour Raspberry) or green (Sweet Pear) to make a version per flavour.
- **Type and safe area:** heavy italic sans for the headline (the preview uses Montserrat Black Italic, close to your pack lettering) and Jost, your website font, for the callouts. Keep text and the logo 60 px from the edges, because the profile grid crops 4:5 posts to 3:4.

HOW TO MAKE IT

- **3D route (best quality):** start from your exploded-view render or the bottle's CAD files. Separate the four parts along one axis in Blender or Cinema 4D, add the glowing powder inside the capsule, and render on the navy set. Add the grid, leader lines, callouts, card, headline and real logo in Photoshop or Figma.
- **AI route (fastest):** AI image tools often invent extra parts or redraw threads and caps wrongly, so don't let AI draw the bottle from scratch. Generate the set, lighting and glow with the prompt below, attach your exploded render as the reference, and composite the real bottle parts on top. Then add all the text in design.

AI image prompt (attach your exploded render; confirm the parts against your CAD)

> Cinematic 3D product render, 4:5. An exploded view of a sports bottle, floating in mid-air on one vertical axis with even gaps between the parts. From top to bottom: a small black ribbed screw cap with a carry loop; a slim clear tube capsule filled with glowing orange powder, hanging from a black ribbed collar; a tall clear cylindrical bottle with a wide threaded mouth, empty, with a printed fill line; a black ribbed screw base. Deep navy-to-black background with a cold blue horizon glow and a faint blueprint grid. Cold blue rim light, soft top light on the black parts, the orange powder glowing warmly inside the capsule. Straight-on camera with a slight three-quarter turn, everything in sharp focus, premium technical product render, empty dark space at the top for a headline and on the left for labels. No text, no logos, no labels.

POST CONTENT

On-image text

- **Eyebrow:** THE BODYRADE® MIXOLOGY BOTTLE, TAKEN APART
- **Headline:** LOCKED IN FRESH.
- **Subline:** Sealed and separated until you twist.
- **01 The cap:** Twist to release the blend.
- **02 The capsule:** Holds your 10g serving, sealed until you twist.
- **03 The bottle:** Ice-cold water, up to the line.
- **04 The base:** Opens to fill. Wash, dry, reuse.
- **Card:** 5-IN-1 · PER 10g: 5g Creatine · 2.5g Citrulline Malate · 1.5g Beta-Alanine · 200mg Caffeine · 200mg L-Theanine. Under it: Contains caffeine. Not recommended for children or pregnant women.
- **Footer:** logo, and a pill: REGISTER FOR A SAMPLE · BODYRADE.COM

Caption

Locked in fresh. 🔒

Here's the Bodyrade® Mixology Bottle, part by part.
01 The cap: twist to release the blend.
02 The capsule: holds your 10g serving, sealed until you twist. Load it straight from the sachet or tub (funnel supplied).
03 The bottle: fill it with ice-cold water to the line, twenty minutes before training.
04 The base: open it to fill, then wash, dry and use it again.

Inside the capsule: 5g Creatine · 2.5g Citrulline Malate · 1.5g Beta-Alanine · 200mg Caffeine · 200mg L-Theanine. Contains caffeine. Not recommended for children or pregnant women.

Developed in Sweden. Made in the UK.

What's the worst thing you've found at the bottom of your gym bag? 👇

Alt text

The Bodyrade Mixology Bottle taken apart on dark navy: cap, glowing orange capsule, empty bottle and base on one line, with yellow labels and a card listing the formula and a caffeine warning. Text: "LOCKED IN FRESH." and "Register for a sample · bodyrade.com".

Other sizes

Story, 1080 × 1920: stretch the gaps, card under the bottle, no text in the top 250 px or bottom 340 px. **Pin, 1000 × 1500:** same layout.

COPY CHECK

- Headline, subline, part jobs, formula, "funnel supplied", "twenty minutes before training" and "Developed in Sweden. Made in the UK." are based on bodyrade.com. Its Register buttons link to bodyrade.com/pages/contact.
- **Caffeine warning:** I couldn't find the site's own wording, so this uses "Contains caffeine. Not recommended for children or pregnant women." Swap in the exact wording from your pack label.
- The parts follow the site's photos and steps; confirm them against your CAD or exploded render.
- **Left off:** the bottle material (not on the site), "Airtight" and "No clumping, no potency loss" (need test evidence), the site's blood flow, energy and strength claims (UK health-claim rules) and "World's first multi-patented" (needs proof). Turn on Instagram's "AI info" label if any of it is AI-generated.
