Organic Fostering: "The Doorframe"

30-second AI video (photoreal, not animation) · 9:16 vertical · Instagram Reels, TikTok and Facebook

CONCEPT

The idea

One locked-off camera shot of a hallway doorframe. A foster child stands against it while her height is marked in pencil. With every beat of the music, years pass in a seamless AI morph: she grows taller, the seasons change through the window, and a new pencil mark and milestone appear beside the old ones. In 30 seconds we watch a child grow up in one loving home.

It brings the brand line **"Nurture. Develop. Grow."** to life in the most literal and emotional way.

Why it's eye-catching

- "Same frame, years pass" morph videos are one of the most watched AI video formats, and the transitions look impossible to film for real.
- The hook promises a payoff ("Watch her grow up in 30 seconds"), so people keep watching to the end.
- The handwritten milestones are small, real moments (a first bike ride, a football team, an eye-roll), which makes them easy to relate to and share.

Why it's new

Our earlier pieces covered eligibility, the allowance, the application steps, cultural matching, the types of fostering and a child's first day ("Unpacked"). This one is about what fostering builds over time: a whole childhood. It also highlights long-term fostering, which the website offers.

SCRIPT

HOOK · 0–3 s

Visual: Close-up of a pencil drawing a short line on a white-painted doorframe, just above the head of a small girl, about 7, standing very straight. An adult's hand writes beside it: "Age 7 · First night here".

On-screen text: Watch her grow up in 30 seconds.

Sound: pencil scratch, then the music starts (soft piano and a gentle pulse).

THE GROWING YEARS · 3–22 s

Visual: The camera stays exactly still. On each beat (about every 3 seconds) the scene morphs and she is older and taller. The light through the window changes season, her clothes and hairstyle change, and a new pencil mark appears above the last one, each with a handwritten note:

1. 3–6 s · "Age 8 · Rode a bike, no stabilisers"
2. 6–9 s · "Age 10 · Joined the football team"
3. 9–12 s · "Age 11 · Big school"
4. 12–15 s · "Age 13 · Mastered the eye-roll 🙄" (she rolls her eyes, then grins)
5. 15–18 s · "Age 16 · GCSEs done!"
6. 18–22 s · "Age 17 · Taller than her foster mum" (her foster mum stands beside her, on tiptoe, laughing)

Sound: a pencil scratch on each mark; the music builds gently.

PAYOFF · 22–26 s

Visual: The camera finally moves, pulling back slowly. The young woman, now 17, turns to the doorframe and touches the lowest mark: "Age 7 · First night here". Her foster mum's hand rests on her shoulder.

On-screen text: Every story starts with one small mark.

Voiceover: "Every story starts with one small mark."

CTA · 26–30 s

Visual: Soft cut to an end card on the magenta-to-orange gradient with the OF logo. A single pencil line draws across the screen and becomes the underline of the headline.

On-screen text: Nurture. Develop. Grow. · Could you make room? · Start the conversation · 0161 241 1332 · organicfostering.co.uk · Rated Good by Ofsted

Voiceover: "Could you make room? Start the conversation with Organic Fostering."

AI PRODUCTION

Method

- Make one still image for each age (7, 8, 10, 11, 13, 16, 17) with exactly the same camera position, hallway and doorframe.
- Use the start-frame / end-frame feature in Kling, Veo or Higgsfield to morph from each still to the next. This creates the seamless "years pass" effect.
- Use the same reference image of the girl in every prompt, with only the age changed, so she looks like one person growing up.
- Add all handwriting and text in the edit, not in the AI image, so nothing is misspelt.

Style line: add to every prompt

Photorealistic, vertical 9:16, locked-off tripod shot, warm UK family hallway, white-painted wooden doorframe with pencil height marks, window on the left, soft natural light, cinematic 35mm, natural skin texture, no text.

Example prompts

- **Age 7:** a small Black British girl aged 7 stands very straight against the doorframe in school uniform, nervous but hopeful; winter light from the window.
- **Age 13:** the same girl aged 13 against the doorframe in a hoodie, rolling her eyes then grinning; autumn light.
- **Age 17:** the same girl aged 17, now slightly taller than the woman beside her, both laughing; summer light.

Sound

- Soft piano and gentle pulse, building to a warm swell at the payoff.
- A crisp pencil scratch on every mark, on the beat.
- Voiceover only at the end: a warm, calm Northern English female voice.

CAPTION

Some stories are written in pencil, one mark at a time. 🧡

Fostering isn't just a first night. It can be every birthday, every first, every eye-roll after that. Could you make room for a story like this?

SAFEGUARDING AND COPY CHECK

- Turn on Instagram's "AI info" label and add the small on-screen note "AI-generated imagery. Not a real child."
- Never use photos or likenesses of real children in care.
- The milestones are a fictional story, not claims or statistics.
- "Nurture. Develop. Grow.", "Could you make room?", long-term fostering, the phone number and "Rated Good by Ofsted" all come from Organic Fostering's own materials.
